

Dear VIZIO Customer,

Congratulations on your new VIZIO GV47L FullHD LCD Television purchase. Thank you for your support. For maximum benefit of your set, please read these instructions before making any adjustments, and retain them for future reference. We hope you will experience many years of enjoyment from your new VIZIO GV47L FullHD Television.

For assistance, please call 714-668-0588 or e-mail us at techsupport@vinc.com.

To purchase or inquire about accessories and installation services for your VIZIO LCD HDTV, please visit our website at www.vizioce.com or call toll free at **888-VIZIOCE (888-849-4623)**.

We recommend you register your VIZIO GV47L FHD TV either at our website www.vizioce.com or fill in your registration card and mail it in. For peace of mind and to protect your investment beyond the standard warranty, VIZIO offers on-site extended warranty service plans. These plans give additional coverage during the standard warranty period. Visit our website or call us to purchase a plan.

Write down the serial number located on the back of your GV47L.

THIS PRODUCT HAS BEEN DESIGNED AND TESTED FOR COMPLIANCE WITH REGULATORY SAFETY CERTIFICATIONS

This product is designed and manufactured to operate within defined design limits, and misuse may result in electric shock or fire. To prevent the product from being damaged, the following rules should be observed for the installation, use and maintenance of the product. Read the following safety instructions before operating the display. Keep these instructions in a safe place for future reference.

- To avoid the risk of electric shock or component damage, switch off the power before connecting other components to the GV47L LCD HDTV.
- Unplug the power cord before cleaning the GV47L LCD HDTV. A damp cloth is sufficient for cleaning the GV47L LCD HDTV. Do not use a liquid or a spray cleaner for cleaning the product. Do not use abrasive cleaners.
- Always use the accessories recommended by the manufacturer to insure compatibility.
- When moving the GV47L LCD HDTV from an area of low temperature to an area of high temperature, condensation may form on the housing. Do not turn on the GV47L LCD HDTV immediately after this to avoid causing fire, electric shock or component damage.
- Do not place the GV47L LCD HDTV on an unstable cart, stand, or table. If the GV47L LCD HDTV falls, it can injure a person and cause serious damage to the appliance. Use only a cart or stand recommended by the manufacturer or sold with the GV47L LCD HDTV.
- A distance of at least 3 feet should be maintained between the GV47L LCD HDTV and any heat source, i.e. radiator, heater, oven, amplifier etc. Do not install the product close to smoke. Operating the product close to smoke or moisture may cause fire or electric shock.
- Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of the GV47L LCD HDTV and to protect it from overheating, be sure these openings are not blocked or covered. Do not place the GV47L LCD HDTV in a bookcase or cabinet unless proper ventilation is provided.
- Never push any object into the slot on the GV47L LCD HDTV cabinet. Do not place any objects on the top of the product. It could short circuit parts causing a fire or electric shock. Never spill liquids on the GV47L LCD HDTV.
- The GV47L LCD HDTV should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
- The power cable must be replaced when using different voltage from that specified in the User Manual. For more information, contact your dealer.
- The GV47L LCD HDTV is equipped with a **three-pronged grounded plug, a plug with a third (grounding) pin**. This plug will fit only into a grounded power outlet as a safety feature. If your outlet does not accommodate the three-wire plug, have an electrician install the correct outlet, or use an adapter to ground the appliance safely. **Do not defeat the safety purpose of the grounded plug.**
- Do not overload power strips and extension cords. Overloading can result in fire or electric shock.
- The wall socket shall be installed near the equipment and shall be easily accessible.
- Only the marked power source can be used for the product. Any power source other than the specified one may cause fire or electric shock.
- Do not touch the power cord during lightning. To avoid electric shock, avoid handling the power cord during electrical storms.
- Unplug the unit during a lightening storm or when it will not be used for long period of time. This will protect the GV47L LCD HDTV from damage due to power surges.
- Do not attempt to repair or service the product yourself. Opening or removing the back cover may expose you to high voltages, the risk of electric shock, and other hazards. If repair is required, please contact your dealer and refer all servicing to qualified service personnel.
- Keep the product away from moisture. Do not expose this appliance to rain or moisture. If water penetrates into the product, unplug the power cord and contact your dealer. Continuous use in this case may result in fire or electric shock.
- Do not use the product if any abnormality occurs. If any smoke or odor becomes apparent, unplug the power cord and contact your dealer immediately. Do not try to repair the product yourself.
- Avoid using dropped or damaged appliances. If the product is dropped and the housing is damaged, the internal components may function abnormally. Unplug the power cord immediately and contact your dealer for repair. Continued use of the product may cause fire or electric shock.
- Do not install the product in an area with heavy dust or high humidity. Operating the product in environments with heavy dust or high humidity may cause fire or electric shock.
- Follow instructions for moving the product. Ensure that the power connector and any other cables are unplugged before moving the product.
- Hold the power connector when removing the power cable. Pulling the power cable itself may damage the wires inside the cable and cause fire or electric shock. When the product will not be used for an extended period of time, unplug the power connector.
- To avoid risk of electric shock, do not touch the connector with wet hands.
- Insert batteries in accordance with instructions. Incorrect polarities may cause damage and leakage of the batteries, operator injury and contamination the remote controller.
- If any of the following occurs please contact the dealer:
 - The power connector fails or frays.
 - Liquid sprays or any object drops into the GV47L LCD HDTV.
 - The Display is exposed to rain or other moisture.
 - The Display is dropped or damaged in any way.
 - The performance of the Display changes substantially.
- Operating environment. Temperature: 40°F ~ 95°F, Humidity: 10% ~ 90% non-condensing, Altitude: 0 ~ 6500ft (0 ~ 2000m)

Television Antenna Connection Protection

External Television Antenna Grounding

If an outside antenna/satellite dish or cable system is to be connected to the TV, make sure that the antenna or cable system is electrically grounded to provide some protection against voltage surges and static charges.

Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of the grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements of the grounding electrode.

Lightning Protection

For added protection of the TV during a lightning storm or when it is left unattended or unused for long periods of time, unplug the TV from the wall outlet and disconnect the antenna or cable system.

Power Lines

Do not locate the antenna near overhead light or power circuits, or where it could fall into such power lines or circuits.

Remember, the screen of the coaxial cable is intended to be connected to earth in the building installation.

Opening the Package

Your VIZIO GV47L FHD TV and its accompanying accessories are carefully packed in a cardboard carton that has been designed to protect it from transportation damage. Now you have opened the carton check that the GV47L FHD TV is in good condition and that all of the accessories are included.

The GV47L FHD TV weighs approximately 90lb and about 45" wide x 32" tall we strongly advise that you have at least 2 people to unpack and install the HDTV.

The glass surface can easily be scratched or broken so please handle the product gently and never place the HDTV with the glass facing downwards on a surface without protective padding.

IMPORTANT: Save the carton and packing material for future shipping.

To purchase or inquire about additional accessories and services for your VIZIO product, visit our web site at www.vizioce.com or call us toll free at 888-VIZIOCE (888-849-4623)

Installation Preparation

Please read this user manual carefully before installing your VIZIO HDTV.

The power consumption of the TV is about 280W, please use the power cord designated for TV. When an extension cord is required, use one with the correct power rating. The cord must be grounded and the grounding feature must not be defeated.

The TV should be installed on a flat surface to avoid tipping. For proper ventilation, you must allow space between the back of the TV and the wall. If you would like to mount your TV on the wall, please see below 'Preparing Your LCD HDTV for Wall Mounting' for additional information. Avoid installing the TV in places with high humidity, dust or smoke so as not to shorten the service life of the electronic components. Install the TV in landscape orientation; any 90° clockwise or counter-clockwise installation may induce poor ventilation and excessive component damage.

VIZIO offers professional installation services. Please contact VIZIO for more information on these services at 888-VIZIOCE (888-849-4623) or www.vizioce.com.

Preparing Your LCD HDTV for Wall Mounting

The VIZIO GV47LHDTV can either be kept on the stand base or mounted on the wall for viewing. If you choose to mount the GV47LHDTV on the wall, please follow the instructions below for removing the stand base.

To remove the stand base

1. Unplug all of the cables and cords from your GV47LHDTV.
2. Place the GV47LHDTV face down on a soft and flat surface (blanket, foam, cloth, etc) to prevent any damage to the TV.
3. Pull the stand cover off by squeezing the sides to release the retaining plastic tabs.

4. Remove the four (4) screws so that the stand base can be removed.
5. Gently remove the stand base.

6. Now, the GV47LHDTV can fit securely to a mount (sold separately) by utilizing the mounting holes in the center of the back panel of the TV. Please make sure to read the instructions of your specific mount to properly hang the GV47LHDTV. The pitch of the mounting holes is 600mm horizontally and 200mm vertically. The screw type required is metric M8, 1.25mm pitch.

To find the perfect mount for the VIZIO GV47LHDTV, browse VIZIO's certified mount selection at www.vizio.com or call directly 888-VIZIOCE (888-849-4623).

If you wish to remove the attached speakers as well and use your Home Theatre System for the audio please see the following procedure.

1. Pull off the aluminum name plate from the front of the TV, between the speakers. It is snapped in place.

2. Unplug the speaker wires from the GV47L at the rear of the TV.

3. Remove the four (4) screws that hold the right speaker in place and remove the four (4) screws that hold the left speaker in place. The screws are identified by arrows molded into the plastic.

Chapter 1 Basic Controls and Connections

1.1 Front Bezel

Power 'VIZIO' light – The VIZIO name lights white when powered on and orange when powered off.

Remote Control Sensor – This is the window through which all of the remote control signals pass to the sensor. Point the remote control directly at this window for the best response to the remote signal.

1.2 Sensor Touch Controls

The GV47L FHD TV is equipped with Sensor Touch Controls that are hidden behind the bezel and remain asleep until you need to use them.

Power () – Switch the GV47LHDTV on by pressing the Sensor Touch area to activate the Controls and then press the power switch location once. Press again to turn the GV47LHDTV off.

Menu – This Control activates the On Screen Display (OSD). If a sub-menu is active, pressing this Control will return to the previous menu level.

Channel +/- – Use these Controls to step up or down the TV channels. While the OSD is active, these function as up and down controls in the OSD menus.

Volume +/- – Use these Controls to increase or decrease to the speaker volume. While the OSD is active, these function as left and right controls in the OSD menus.

Input (Enter) – Repeated pressing of this Control steps through the input sources in the following sequence: TV, AV1, AV2, Component 1, Component 2, RGB, HDMI 1 and HDMI 2. Once you have stepped through the entire sequence, you will return to the beginning.

Additionally, when the OSD is active, this Control confirms the menu function to be adjusted. When the OSD is not active, pressing this button will display the current input mode.

1.3 Rear Panel Connections

Left Portion

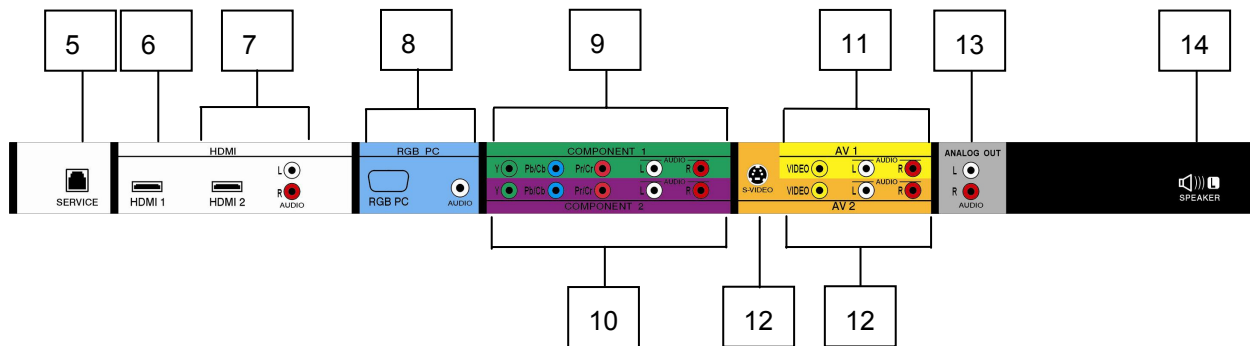

1. **SPEAKER** – Connection for right speaker.
2. **AC IN** – Plug-in the supplied AC Power Cord here.
3. **DTV** – Connect to an antenna or cable/digital cable for TV and Digital TV.*
4. **OPTICAL DIGITAL AUDIO OUT** – When the DTV input is selected for viewing, the digital audio associated with digital programming will be available on this SPDIF Optical connector for connection to your home theatre system. The gray color band on the rear of the TV indicates this connection.

* For digital TV stations in your area visit www.antennaweb.org.

Right Portion

5. **SERVICE** – This custom communication port is for factory service only.
6. **HDMI 1** – Connect the primary source for digital video such as a DVD multimedia player or set top box through this all digital connector. The white color band on the rear of the TV indicates this connection. Your VIZIO Certified HDMI cables are available for purchase from www.vizio.com or by calling 888-VIZIOCE (888-849-4623).
7. **HDMI 2** – Connect the secondary source for digital video such as a DVD multimedia player or set top box through this all digital connector. The white color band on the rear of the TV indicates this connection. For users who want to connect to a DVI enabled device, use a DVI-HDMI cable and connect the Analog Audio output of the device to the L+R AUDIO here. Your VIZIO Certified HDMI and HDMI-DVI cables are available for purchase from www.vizio.com or by calling 888-VIZIOCE (888-849-4623).
8. **RGB PC** – Connect the video and audio from a computer here. The blue color band on the rear of the TV indicates this connection.
9. **COMPONENT 1 (YPb/CbPr/Cr with Audio L/R)** – Connect the primary source for component video devices such as a DVD Player or set top box here. From left to right, use green for Y, blue for Pb (or Cb), red for Pr (or Cr), white for left audio and red for right audio inputs. The green color band on the rear of the TV indicates this connection.
10. **COMPONENT 2 (YPb/CbPr/Cr with Audio L/R)** – Connect the secondary source for component video devices such as a DVD Player or set top box here. From left to right, use green for Y, blue for Pb (or Cb), red for Pr (or Cr), white for left audio and red for right audio inputs. The purple color band on the rear of the TV indicates this connection.
11. **AV1 In** – Connect the primary source for composite video devices, such as a VCR or video game. Use the white and red connectors to connect the external audio from the same source. The yellow color band on the rear of the TV indicates this connection.
12. **AV2 In** – Connect the secondary source for composite video devices, such as a VCR or video game. Use the white and red connectors to connect the external audio from the same source. The orange color band on the rear of the TV indicates this connection. The S-Video connector in the red area is associated with AV2 and if connected will take priority over AV2 RCA connector.
13. **Audio Out** – Connect the audio from the LCD HDTV to an external device, such as a home theatre system, external amplifier or stereo. Speakers cannot be connected directly to here. The gray color band on the rear of the TV indicates this connection.
14. **SPEAKER** – Connection for left speaker.

1.4 VIZIO Universal Remote Control

The VIZIO Universal Remote Control is a comprehensive remote that can be used to control up to four different components. The remote button functions are explained on the following pages.

SET – This button starts all programming of the Remote Control.

Remote LED – Blinks when the remote operates.

POWER – Press this button to turn the TV on from the Standby mode. Press it again to return to the Standby mode.

TV – This button has been pre-programmed to select the codes to operate the GV47LHDTV.

VCR – This button selects a programmed VCR.

CABLE – This button selects a programmed cable TV set-top box or a satellite TV set-top box.

DVD – This button selects a programmed DVD player.

Number Button Pad – Use these buttons to select a channel or enter a password.

INPUT – This button allows the user to cycle through the inputs.

- / ENTER – This button works as a DASH button in the DTV mode. When selecting a digital channel directly use this button for the separation of main and sub-channels. For example, channel 28-2 would be selected by the button sequence 2 8 ENTER 2.

CH (+ or -) – These buttons change the channels up or down.

LAST – This button recalls the previously viewed channel.

MUTE – This button turns the sound on and off.

VOL (+ or -) – These buttons turn the volume up or down.

MENU – Use this button for the On-Screen Display (OSD) menus.

INFO – This button displays the image and system information display.

GUIDE – This button displays program information. Note: this button is only functional for DTV.

EXIT – This button exits the On-Screen Display (OSD) menus.

 - These buttons navigate the On-Screen Display (OSD).

OK – Use this button to select your chosen option in On-Screen Display (OSD) menus.

NOTE: This is a programmable remote supporting up to 4 devices (see TV, VCR, CABLE, DVD buttons at the top of the remote). If the remote is not working with your VIZIO TV, press the TV button on the remote to set the functions back to TV.

WIDE/Record – This button cycles through the available screen formats. The options are Wide, Normal, Zoom, Panoramic. *Note:* in RGB/PC mode the options are 4:3 and 16:9. This button also functions as VCR Record when the component is activated with the remote control.

SLEEP/Pause – This button allows the user to select the sleep options by adjusting the timer in 30 minute increments up to 120 minutes. Additionally, this button pauses the CD, DVD or VCR when the component is activated with the remote control.

MTS/Play – This button will select the MTS options of Stereo, SAP or Mono in TV mode and alternate audio channels, where available, in DTV mode. Additionally, this button plays the CD, DVD or VCR when the component is activated with the remote control.

CC/Stop – This button will select the Closed Caption mode. The options are OFF, CC1, CC2, CC3, CC4, TEXT1, TEXT2, TEXT3 OR TEXT4. Additionally, this button stops the CD, DVD or VCR when the component is activated with the remote control.

TV/Previous Chapter – Repeated pressing of this button switches between DTV and TV programming. *Note:* this button has been pre-programmed for the VIZIO GV47LHDTV. This button also functions as a DVD Previous Chapter when the DVD player is activated with the remote control.

AV/Reverse – Repeated pressing of this button with switch between AV1 and AV2 inputs. Additionally, this button rewinds the CD, DVD or VCR when the component is activated with the remote control.

COMPONENT/Forward – Repeated pressing of this button with switch between Component 1 and Component 2 inputs. Additionally, this button forwards the CD, DVD or VCR when the component is activated with the remote control.

HDMI/ Next Chapter – Repeated pressing of this button will switch between HDMI 1 and HDMI 2 inputs. Additionally, this button functions as a DVD Next Chapter when the component is activated with the remote control.

ZOOM (- and +) – Use these buttons to increase or decrease the size of the picture. *Note:* that in the zoom mode parts of the picture will not be visible because they extend beyond the edges of the screen.

FREEZE – Press this button to “Freeze-Frame” the current screen. Press this button again the continue playing.

RGB – This button selects an RGB Analog component such as a PC.

PIP – Use this button to activate the Picture-In-Picture mode.

PIP CH (- and +) – These buttons are used to select the channels within the PIP screen when DTV/TV is the PIP input selected.

AUDIO – Press this button to switch the audio from the main screen to the sub-screen while in PIP or POP mode.

PIP INPUT – Press the button to choose the PIP input. *Note:* The TV must be in PIP/POP mode for this button to be functional. For additional information regarding the PIP/POP options, see section 4.15.3 - Picture-In-Picture (PIP)/Picture-by-Picture (POP) Mode, page 55.

PIP SIZE – Press this button to select the size of the PIP screen from one of the following: small, medium or large.

MODE – Use this button to change the picture mode from Custom, Standard, Movie and Game.

SWAP – Used to swap the inputs from the main screen and the sub-screen while in PIP/POP mode.

1.4.1 Insertion of Batteries in the Remote Control

Insert two AA batteries into the remote control. Make sure that you match the (+) and (-) symbols on the batteries with the (+) and (-) symbols inside the battery compartment. Re-attach the battery cover.

Precautionary Tips for Inserting the Batteries:

Only use the specified AA batteries.

Do not mix new and old batteries. This may result in cracking or leakage that may pose a fire risk or lead to personal injury.

Inserting the batteries incorrectly may also result in cracking or leakage that may pose a fire risk or lead to personal injury.

Dispose of the batteries in accordance with local laws and regulations.

Keep the batteries away from children and pets.

1.4.2 Remote Control Range

Point the remote control at the remote control sensor to transmit the commands.

Do not place any obstacles between the remote control and the receiver window.

The effective range of the remote control is approximately 30 feet (10 meters) from the front of the receiver window, 30° to the left and right, 20° up and down.

1.4.3 VIZIO Universal Remote Control Precautions

The remote control should be kept dry and away from heat sources. Avoid humidity.

If the TV responds erratically to the remote control or does not respond at all, check the batteries. If the batteries are low or exhausted, replace them with fresh batteries.

When not using the remote control for a long period of time, remove the batteries.

Do not take the batteries apart, heat them, or throw them into a fire.

Do not subject the remote control to undue physical stress, such as striking or dropping it.

Do not attempt to clean the remote control with a volatile solvent. Wipe it with a clean, damp cloth.

Chapter 2 Connecting Equipment

2.1 Which Video Connection Should I Use?

The VIZIO GV47LHDTV has six different ways to connect your video equipment from a basic connection to the most advanced for digital displays.

| Connection Quality (type) | Connector | Rear Panel Color Codes | Description |
|--|---|------------------------|--|
| Best (digital) |  | White | HDMI (High-Definition Multimedia Interface) - It is the first and only industry-supported, uncompressed, all-digital audio/video interface. HDMI provides an interface between any audio/video source, such as a set-top box, DVD player, or A/V receiver and an audio and/or video monitor, such as a digital television (DTV), over a single cable. |
| Best (digital) ----- Good (analog) |  | Black | DTV Coaxial RF. When used for MPEG2 encoded bit streams from ATSC broadcast programming, this input takes advantage of the High Definition content. ----- TV Coaxial RF. This is the connection for standard NTSC TV using antenna or cable. |
| Best (analog) |  | Blue | RGB PC (VGA) – This video input has separate red, green and blue color components. The signal carries horizontal and vertical sync information on the green signal. This is most commonly used for PC input. |
| Better (analog) |  | Green and Purple | Component 1/2 - The video signal is separated into three signals, one containing the black-and-white information and the other two containing the color information. This enhancement over S-Video takes advantage of the superior picture provided by progressive scan DVD players and HDTV formats. |
| Good (analog) |  | Orange | S-Video (AV2) - The video signal is separated into two signals, one containing the black-and-white information and the other containing the color information. Separating the color in this way avoids 'cross color' effects where closely spaced black and white lines are erroneously displayed in color. It also enables text to be displayed more sharply. |
| Good (analog) |  | Yellow and Orange | AV1/2 (Composite) - The complete video signal is carried through this single pin connector. This is the most commonly used video connection. |

Note: For more info refer to the Quick Start Guide

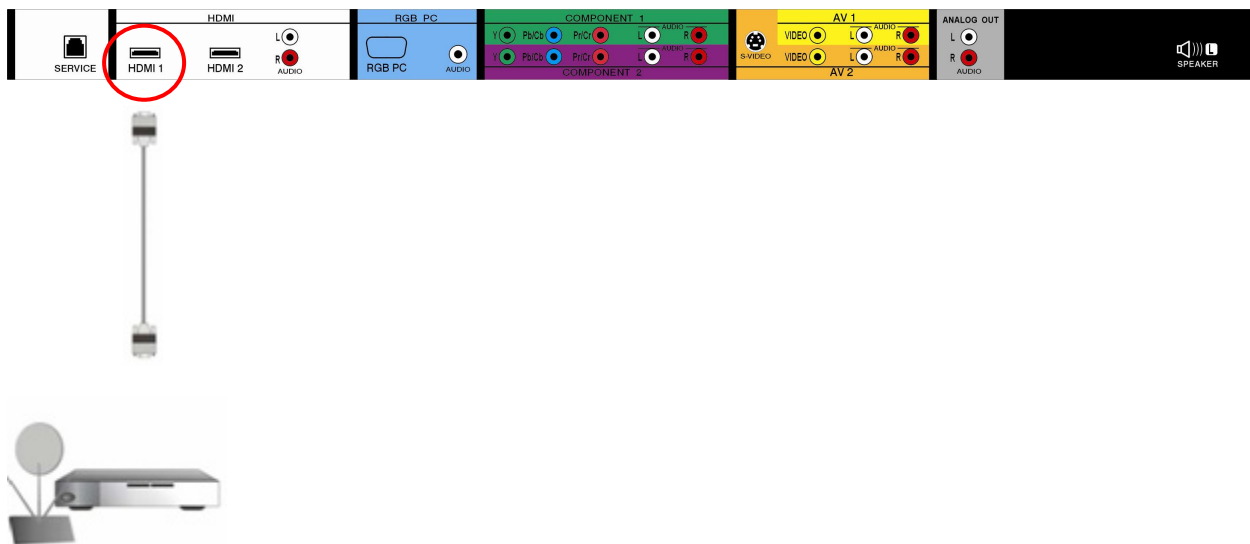

2.2 Connecting Your Cable or Satellite Box

2.2.1 Using HDMI

Cable and Satellite Boxes that have a HDMI digital interface should be connected to the HDMI input of the LCD HDTV for optimal results.

Note: To maintain the display quality, use a VIZIO certified HDMI cable that is 10 meters or less. See www.vizioce.com or call 1-888-VIZIOCE (1-888-849-4623) for details.

Connecting your Cable or Satellite Box (Best)

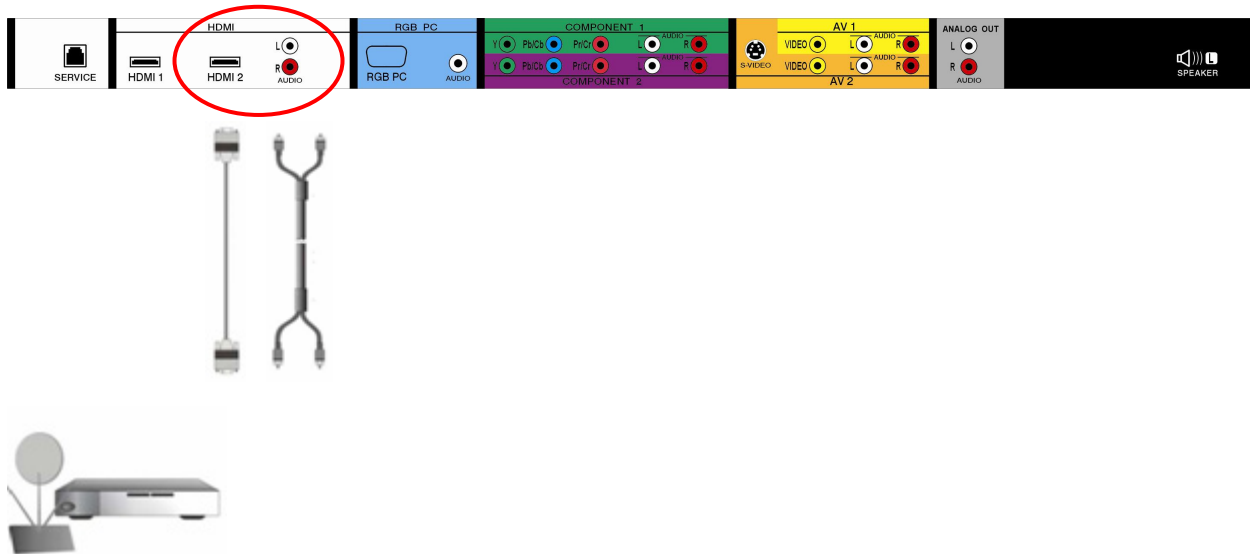

1. Turn off the power to the LCD HDTV and HDTV Set-Top Box.
2. Connect a HDMI cable to the HDMI output of your HDTV Set-Top Box and the other end to the HDMI Input (white color area) at the rear of the LCD HDTV.
3. Turn on the power to the LCD HDTV and HDTV Set-Top Box.
4. Select HDMI using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the HDMI button on the Remote Control.

Note:

- a) The HDMI input on the LCD TV supports High-bandwidth Digital Content Protection (HDCP). HDCP encrypts the transmission between the video source and the digital display for added security and protection.
- b) If you are already using the HDMI 1 input for another component, or you do not want to use the HDMI 1 input for the Set-Top Box, you can connect the Set-Top Box to the HDMI 2 connection.
- c) Refer to your HDTV Set-Top Box user manual for more information about the video output requirements of the product or consult your cable or satellite operator.

For Cable or Satellite Boxes with DVI:

1. Turn off the power to the LCD HDTV and HDTV Set-Top Box.
2. Using a HDMI-DVI cable, connect the DVI end to your HDTV Set-Top Box and the HDMI end to the HDMI Input (white color area) at the rear of the LCD HDTV.
3. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the DVI output on your HDTV Set-Top Box and connect the other end to the audio connectors associated with the HDMI input (white area) at the rear of the LCD HDTV.
4. Turn on the power to the LCD HDTV and HDTV Set-Top Box.
5. Select HDMI using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the HDMI button on the Remote Control.

Note: The HDMI Input is for HD Video and will only support 640x480 at 60Hz from a PC. Use the RGB PC input for a greater selection of PC formats.

Note:

- d) The HDMI input on the LCD TV supports High-bandwidth Digital Content Protection (HDCP). HDCP encrypts the transmission between the video source and the digital display for added security and protection.
- e) Refer to your HDTV Set-Top Box user manual for more information about the video output requirements of the product or consult your cable or satellite operator.

2.2.2 Using Component Video

Connecting your Cable or Satellite Box (Better)

1. Turn off the power to the LCD HDTV and HDTV Set-Top Box.
2. Connect the Y (green color) connector on your HDTV Set-Top Box to the corresponding Y (green color) connector in the Component 1 group (green color area - row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
3. Connect the Pb (blue color) connector on your HDTV Set-Top Box to the corresponding Pb (blue color) connector in the Component 1 group (green color area - row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
4. Connect the Pr (red color) connector on your HDTV Set-Top Box to the corresponding Pr (red color) connector in the Component 1 group (green color area - row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
5. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the Component output on your HDTV Set-Top Box and connect the other end to the audio connectors associated with the Component 1 input (green color area) at the rear of the LCD HDTV.
6. Turn on the power to the LCD HDTV and HDTV Set-Top Box.
7. Select Component 1 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the Component button on the Remote Control.

Note:

- a) If you are already using the Component 1 input for another component, or you do not want to use the Component 1 input for the Set-Top Box, you can connect the Set-Top Box to the Component 2 connections coded by the purple area.
- b) Refer to your HDTV Set-Top Box user manual for more information about the video output requirements of the product or consult your cable or satellite operator.

2.3 Connecting Coaxial (RF)

2.3.1 Using Your Antenna or Digital Cable for DTV

1. Turn off the power to the LCD HDTV.
2. Connect the coaxial (RF) connector from your antenna or digital cable to the DTV/TV CABLE/ANTENNA connector at the rear of the LCD HDTV.
3. Turn on the power to the LCD HDTV.
4. Select DTV using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the TV button on the Remote Control.

Note:

- a) Not all digital TV broadcasts are High Definition (HD). Refer to the program guides, or consult your cable, satellite or TV station operator.
- b) Digital broadcasts are not available in all areas. Refer to www.antennaweb.org for detailed information.
- c) Make sure the antenna and coaxial cable are correctly grounded.
- d) For Professional antenna installation contact VIZIO at www.VIZIOCE.com or call 1-888-VIZIOCE (1-888-849-4623).

2.3.2 Using Your Antenna or Cable for TV

1. Turn off the power to the LCD HDTV.
2. Connect the coaxial (RF) connector from your antenna or cable to the DTV/TV CABLE/ANTENNA connector at the rear of the LCD HDTV
3. Turn on the power to the LCD HDTV.
4. Select TV using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the TV button on the Remote Control.

2.3.3 Using the Antenna or Cable through your VCR

1. Turn off the power to the LCD HDTV and VCR.
2. Connect the “Output to TV”, “RF Out” or “Antenna Out” connector on the rear of your VCR to the DTV/TV CABLE/ANTENNA connector at the rear of the LCD HDTV.
3. Turn on the power to the LCD HDTV and VCR.
4. Select TV using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the TV button on the Remote Control.

Note: If you have an off-air antenna or cable TV, connect it to the “Antenna In” connector on the rear of your VCR.

2.4 Connecting Your DVD Player

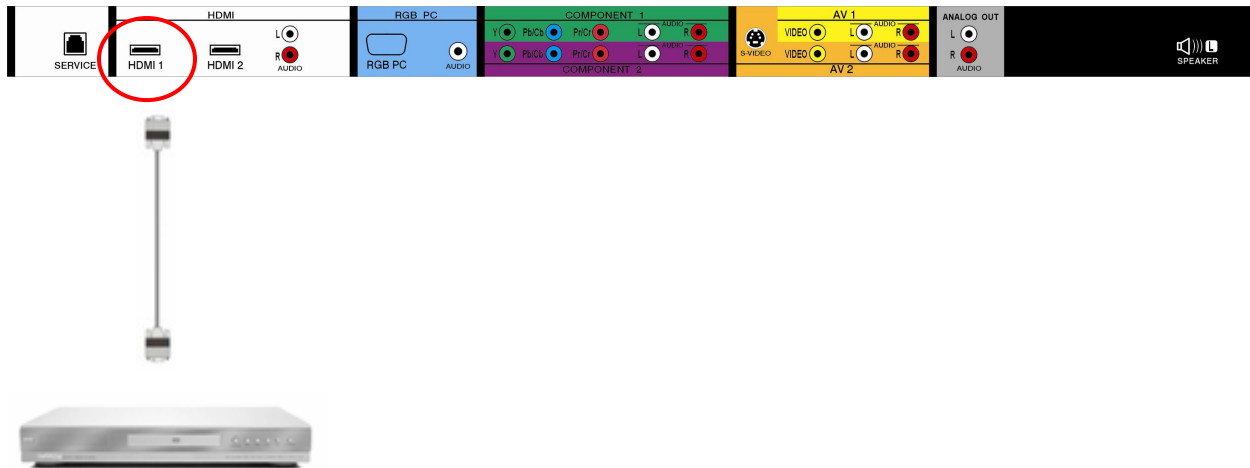

You have several options for connecting your DVD player to your GV47LHDTV – HDMI, Component, S-Video and Composite (AV) inputs. Based on your home theater configuration, you can decide which option is the right one for you.

2.4.1 Using HDMI

DVD players that have a digital interface such as HDMI (High Definition Multimedia Interface) should be connected to the HDMI input of the VIZIO GV47LHDTV for optimal results.

Note: To maintain the display quality, use a VIZIO certified HDMI cable available up to 10 meters or less. See www.VIZIO.com or call 1-888-VIZIOCE (1-888-849-4623) for details.

Connecting your DVD Player (Best):

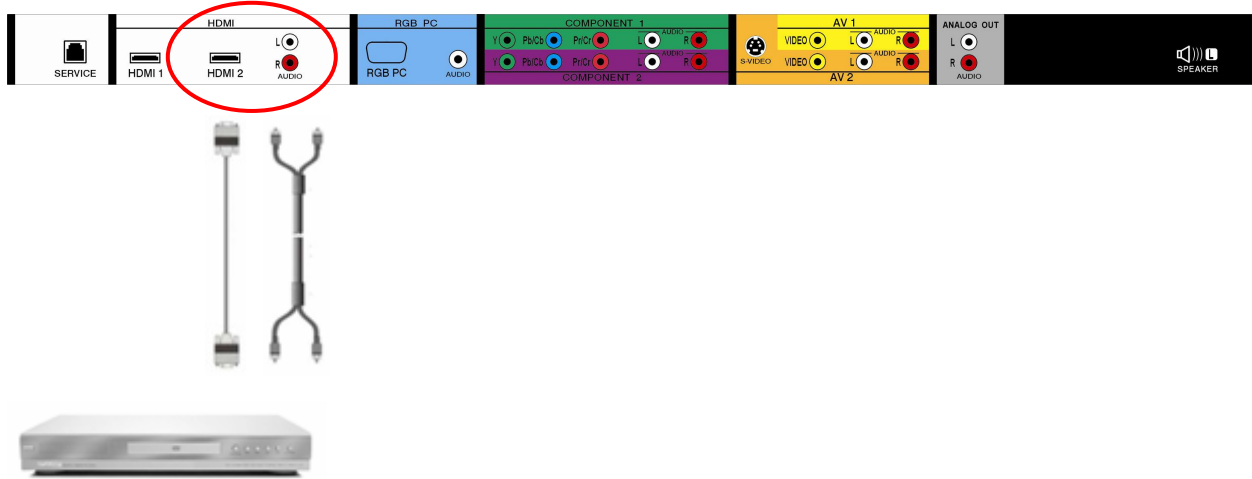

1. Turn off the power to the LCD HDTV and DVD player.
2. Connect a HDMI cable to the HDMI output of your DVD player and the other end to the HDMI Input (white color area) at the rear of the LCD HDTV.
3. Turn on the power to the LCD HDTV and your DVD player.
4. Select HDMI using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the HDMI button on the Remote Control.

Note:

- a) If you are already using the HDMI 1 input for another component, or you do not want to use the HDMI 1 input for the DVD player, you can connect the DVD player to the HDMI 2 connection.
- b) Refer to your DVD player user manual for more information about the video output requirements of the product.

For DVD Players with DVI:

1. Turn off the power to the LCD HDTV and DVD player.
2. Using a HDMI-DVI cable, connect the DVI end to your DVD player and the HDMI end to the HDMI Input (white color area) at the rear of the LCD HDTV.
3. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the DVI output on your DVD player and connect the other end to the audio connectors associated with the HDMI input (white area) at the rear of the LCD HDTV.
4. Turn on the power to the LCD HDTV and your DVD player.
5. Select HDMI using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the HDMI button on the Remote Control.

Note: Refer to your DVD player user manual for more information about the video output requirements of the product.

2.4.2 Using Component Video

Connecting your DVD Player (Better):

1. Turn off the power to the LCD HDTV and DVD player.
2. Connect the Y (green color) connector on your DVD player to the corresponding Y (green color) connector in the Component 1 group (green color area - row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
3. Connect the Pb (blue color) connector on your DVD player to the corresponding Pb (blue color) connector in the Component 1 group (green color area - row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
4. Connect the Pr (red color) connector on your DVD player to the corresponding Pr (red color) connector in the Component 1 group (green color area - row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
5. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the Component output on your DVD player and connect the other end to the audio connectors associated with the Component 1 input (green color area) at the rear of the LCD HDTV.
6. Turn on the power to the LCD HDTV and DVD player.
7. Select Component 1 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the Component button on the Remote Control.

Note:

- a) If you are already using the Component 1 input for another component, or you do not want to use the Component 1 input for the DVD player, you can connect the DVD player to the Component 2 connections coded by the purple area.
- b) Refer to your DVD player user manual for more information about the video output requirements of the product.

2.4.3 Using S-Video (AV2)

Connecting your DVD Player (Good):

1. Turn off the power to the LCD HDTV and DVD player.
2. Connect the S-Video jack on the rear of your DVD player to the S-Video jack in the AV2 group (red area) at the rear of the LCD HDTV.
3. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the S-Video output on your DVD player and connect the other end to the audio connectors associated with the AV2 input (orange area) at the rear of the LCD HDTV.
4. Turn on the power to the LCD HDTV and DVD player.
5. Select AV2 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the AV button on the Remote Control.

Note: Refer to your DVD player user manual for more information about the video output requirements of the product.

2.4.4 Using Composite (AV) Video

Connecting your DVD Player (Good):

1. Turn off the power to the LCD HDTV and DVD player.
2. Connect the Video (yellow color) connector on your DVD player to the Video (yellow color) connector in the AV1 group (yellow color area - row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
3. Connect the R (red color) and L (white color) audio connectors on your DVD player to the corresponding R (red color) and L (white color) audio input connectors in the AV1 group (yellow color area - row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
4. Turn on the power to the LCD HDTV and DVD Player.
5. Select AV1 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the AV button on the Remote Control.

Note:

- a) If you are already using the AV1 input for another component, or you do not want to use the AV1 input for the DVD player, and you are not using the S-Video input for another component, you can connect the DVD player to the AV2 connections coded by the orange area.
- b) Refer to your DVD player user manual for more information about the video output requirements of the product.

2.5 Connecting Your VCR or Video Camera

1. Turn off the power to the LCD HDTV and VCR or Video Camera.
2. Connect the S-Video jack on the rear of your VCR or Video Camera to the S-Video jack in the AV2 group (red area) at the rear of the LCD HDTV.
3. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the S-Video output on your VCR or Video Camera and connect the other end to the audio connectors associated with the AV2 input (orange area) at the rear of the LCD HDTV.
4. Turn on the power to the LCD HDTV and VCR or Video Camera.
5. Select AV2 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the AV button on the Remote Control.

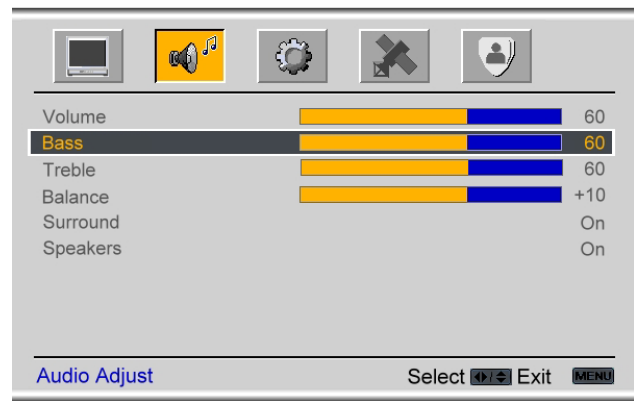

Note: Refer to your VCR or Video Camera user manual for more information about the video output requirements of the product.

2.6 Connecting an external Receiver/Amp

1. Turn off the power to the LCD HDTV and Receiver/Amp.
2. Using an audio cable (white and red connectors), connect the cable to the audio input connectors on the Receiver/Amp and connect the other end to the ANALOG OUT (white area) audio connectors at the rear of the LCD HDTV.
3. Turn on the power to the LCD HDTV and Receiver/Amp.
4. Then press the MENU button on the remote control to open the On-Screen Display (OSD) menu.
5. Press the on the remote control to select the Audio Adjust menu.
6. Press the on the remote control to select SPEAKERS.
7. Press the on the remote control to select OFF so that the sound from the LCD HDTV will now be routed through your Receiver/Amp system.

Note:

- a) Refer to your Receiver/Amp user manual to select the corresponding audio input.
- b) The audio output is not amplified and cannot be connected directly to external speakers.

Optical Output of Audio received with HD Programs

If your sound system has a SPDIF (optical) digital audio input you can connect it to the optical DIGITAL AUDIO OUT (black area) at the rear of the LCD HDTV. This is active when receiving digital audio with the programs from the DTV/TV CABLE/ANTENNA input.

2.7 Connecting a PC Computer

1. Turn off the power to the LCD HDTV and PC Computer.
2. Connect a 15-pin D-Sub RGB (VGA) cable to the RGB output of your pc computer and the other end to the RGB PC input (purple area) at the rear of the LCD HDTV.
3. Connect the Audio Out on your pc computer to the RGB PC Audio input (purple area) at the rear of the LCD HDTV.
4. Turn on the power to the LCD HDTV and PC Computer.
5. Select RGB using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the RGB button on the Remote Control.

Note:

- a) For the best picture quality when connecting a pc computer through RGB PC, set your pc computer timing mode to VESA 1360x768 at 60Hz. Please refer to the pc or graphic card's user guide for additional information on how to set the timing mode.
- b) Refer to your pc computer user manual for more information about the video output requirements of the product.
- c) A RGB (VGA) cable and stereo mini jack cable are not included and can be purchased at an electronics store.

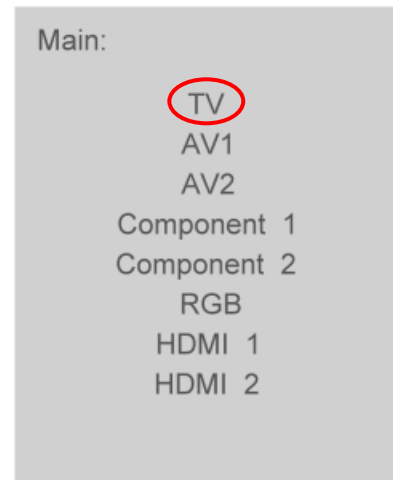

Chapter 3 Setting Up to Watch Television

For 'Preparing Your LCD HDTV for Wall Mounting', see page 6.

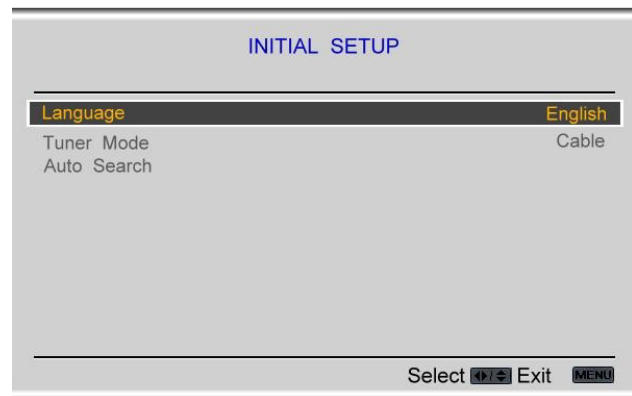

3.1 Basic LCD HDTV Start Up

1. **Connecting the Power Cable**
Connect the power cord to the power cord connector on the back of the LCD HDTV, and then plug the power cord into an AC wall socket.
2. **Connect Audio and Video Cables to the LCD HDTV**
(see pages 16 ~ 29 for detailed steps)
3. **Turning Power On**
Once all the components are connected, press the Power ON button on the side of the LCD HDTV, or press the Power ON (Red) button on the remote control.
4. **Select Input Source**
Select the Input Source for the LCD HDTV by pressing the INPUT button on the side of the TV or using the Input button on the remote control. Pressing this button will cycle you through the following options: TV, AV1, AV2, Component 1, Component 2, RGB, HDMI 1 and HDMI 2.
5. **Using DTV and TV with an Antenna or Cable**
If an antenna or cable source is connected to the DTV/TV input, you will need to select TV using the INPUT button on the remote control or the side of the LCD HDTV, or directly by pressing the TV button on the remote control, and Auto Scan for the available TV channels..

Please follow the instructions below:

- a. Select TV input (see Step 4 above) by pressing the INPUT button on the side of the LCD HDTV or using the INPUT button on the remote control, or directly by pressing the TV button on the remote control. The screen will show 'snow' and an OSD panel that says, "Initial Setup"
- b. The Language option is highlighted and the default is English. If you wish to change the OSD language to Français or Español, press the  or  button on the remote control to select the language you want.

Note: If you do not see this option within the OSD, you might have selected the wrong input in the previous steps and you will need to repeat step 4 (above) to select the correct input source.

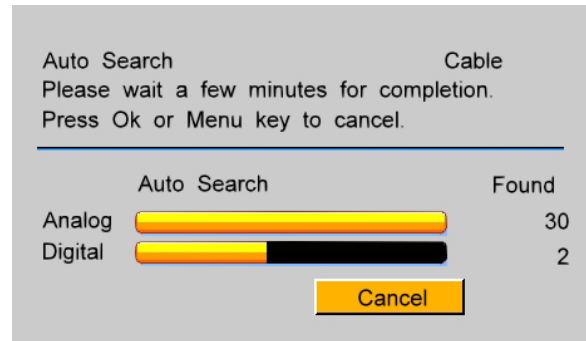

- c. Press the  button to highlight the TUNER MODE option. There are three choices for the input, CABLE or AIR (for antenna), and if you are not sure of your source or you want the TV to scan for both types, AUTO. Press the  or  button to select your choice.

- d. Once selected, press the  button to highlight Auto Search to scan the available channels.

- e. Press the OK button to start the search. An information panel will be displayed showing the progress of the search for analog (NTSC) and Digital (ATSC) channels.

Note: DTV digital broadcast is not available in all areas. Refer to www.antennaweb.org to get

information about availability in your area, type of antenna and in which direction to point your antenna. The channel availability through cable depends upon which channels your cable operator supplies in Clear QAM; consult your cable operator for more information.

6. Using a PC

If connecting to a PC through the RGB PC input, set the TV timing mode to VESA 1360x768 at 60Hz for best picture quality (refer to the graphic card's user guide for questions on how to set this timing mode).

3.2 Watching a TV Program

Before you start watching TV, please make sure that any cable, satellite or off-air antenna connections are secure. Also, verify that the power cord is plugged into a correctly grounded electrical outlet or surge protector.

1. Press the power button on the remote or on the side of the LCD HDTV. The status VIZIO logo on the front will change from orange to white. When changing the color will be bright for a second or two and then dim to a lower light level.
2. There are 3 options for selecting your programming:
 - a. If you are using an antenna or cable connected through the DTV/TV CABLE/ANTENNA input, you can select TV directly by pressing the TV button on the remote, or by pressing the INPUT button on the remote or on the side of the LCD HDTV.
 - b. If you are watching broadcasts through a cable or satellite set-top box connected by an HDMI cable, select HDMI 1 or HDMI 2 directly by pressing the HDMI button on the remote, or by pressing the INPUT button on the remote or on the side of the LCD HDTV.
 - c. If you are watching broadcasts through a cable or satellite set-top box connected by a Component (YPbPr) cable, select Component 1 or Component 2 directly by pressing the Component button on the remote, or by pressing the INPUT button on the remote or on the side of the LCD HDTV.

Note: You should be able to see a picture. If you do not, make sure that all of the LCD HDTV connections are secure and you have selected the correct video input source.

3. When using option 2a, press the Channel buttons on the remote or the +/- buttons on the side of the LCD HDTV to change the channel. **Note:** The Channel buttons, on the side of the LCD and on the remote, control will not work if you are watching a program using HDMI, Component 1, Component 2, AV1 and AV2 inputs.

3.3 Adjusting Basic LCD HDTV Settings

Volume

To increase the volume, press and hold the VOL+ or VOL- button on the side of the LCD HDTV or remote control until the desired level is reached.

TV Channels

To step up or down through the available TV channels, press the CH+ or CH- button on the side of the LCD HDTV or remote control once for the next or previous channel, or hold it depressed until the desired channel is reached. **Note:** Channel up and down will only operate in DTV and TV modes.

Wide

Using this feature, you can watch video content in different size modes on the TV. Press the WIDE button on the remote control to switch among the modes.

For more information see Section 4.15.2 – Viewing Modes, on page 54.

3.4 Program Information

Press the GUIDE button on the remote and program information for the channel you are watching will be displayed on the screen with the live program content in a small window in the lower left corner of the panel.

Press the  or  button to scroll up or down the channels. Each time you pause at a channel, the program list will update with the program schedule for the channel and the window will show the live program for that channel. Press the GUIDE button to exit this feature.

3.5 Information on LCD HDTV Status

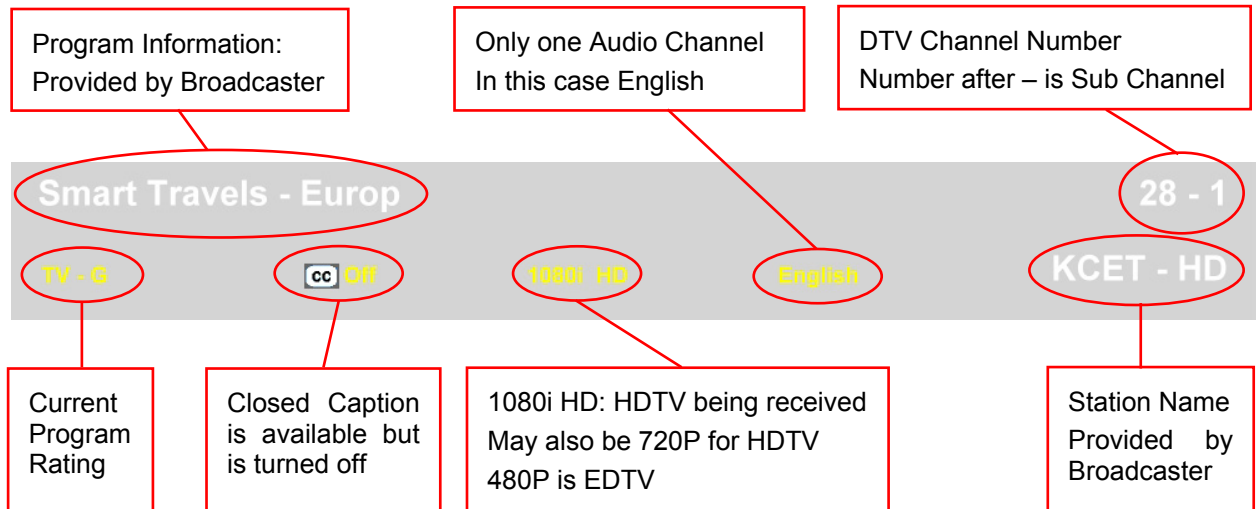

When you change TV channels or inputs, or press the INFO button on the remote, an Information Banner is displayed for a few seconds to tell you the status of the LCD HDTV.

3.5.1 No PIP or POP

TV Input, no PIP

DTV Input, no PIP

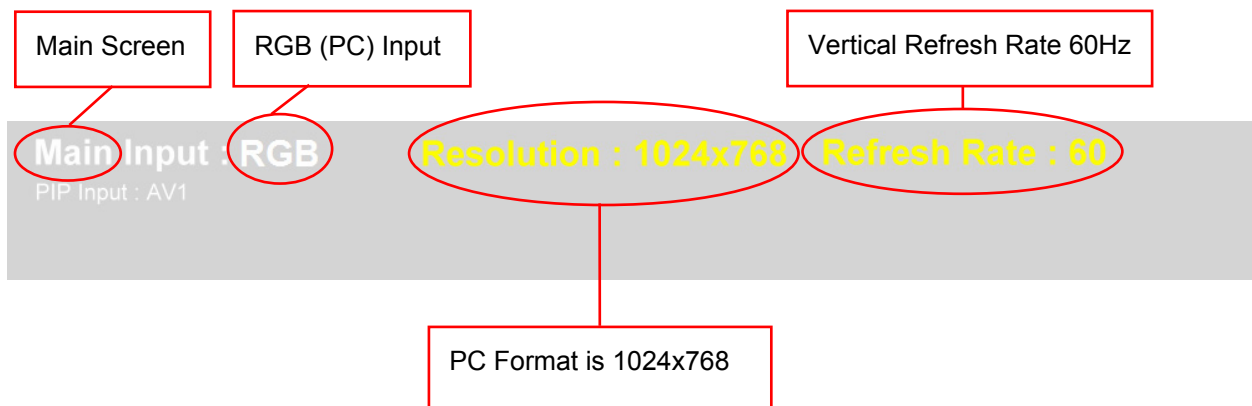

Component (YPbPr) Input, no PIP

AV Input, no PIP

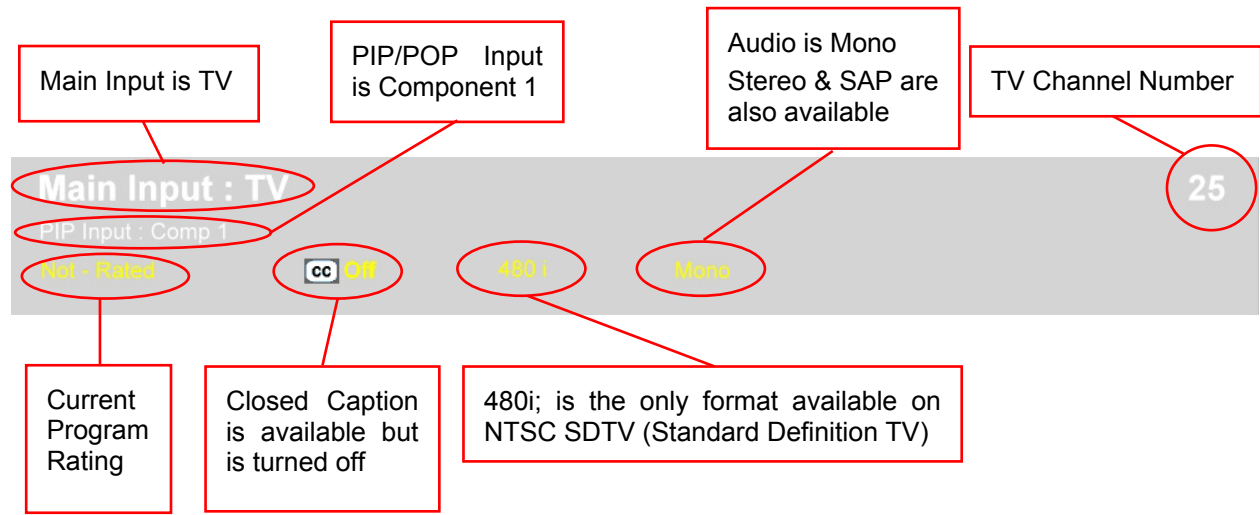

AV1 and AV2 Information Banner have similar information to the Component 1 and Component 2 Information Banners.

PC Input, no PIP

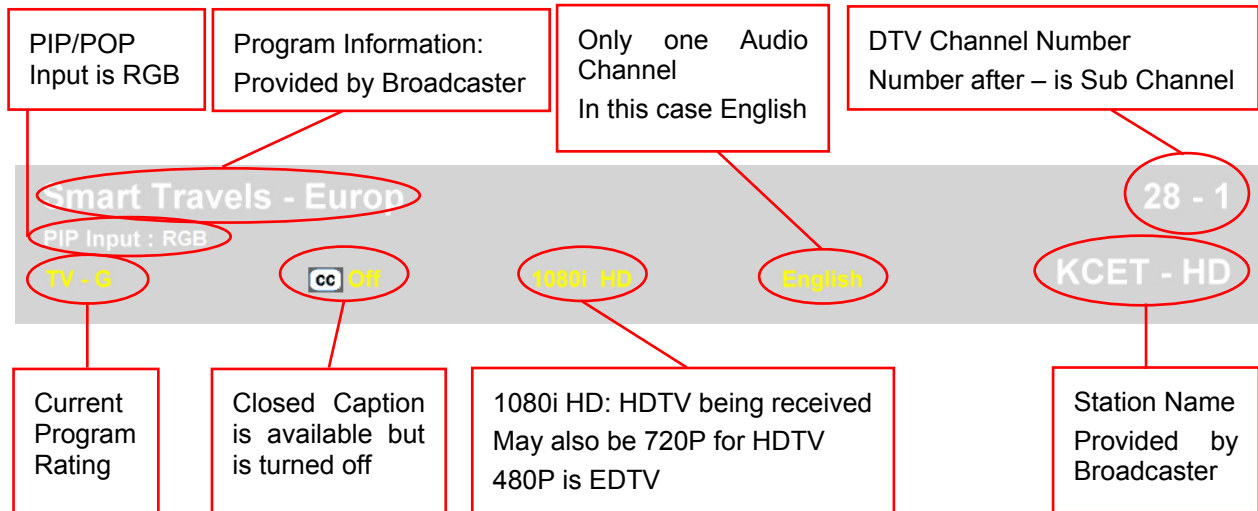

3.5.2 With PIP and POP

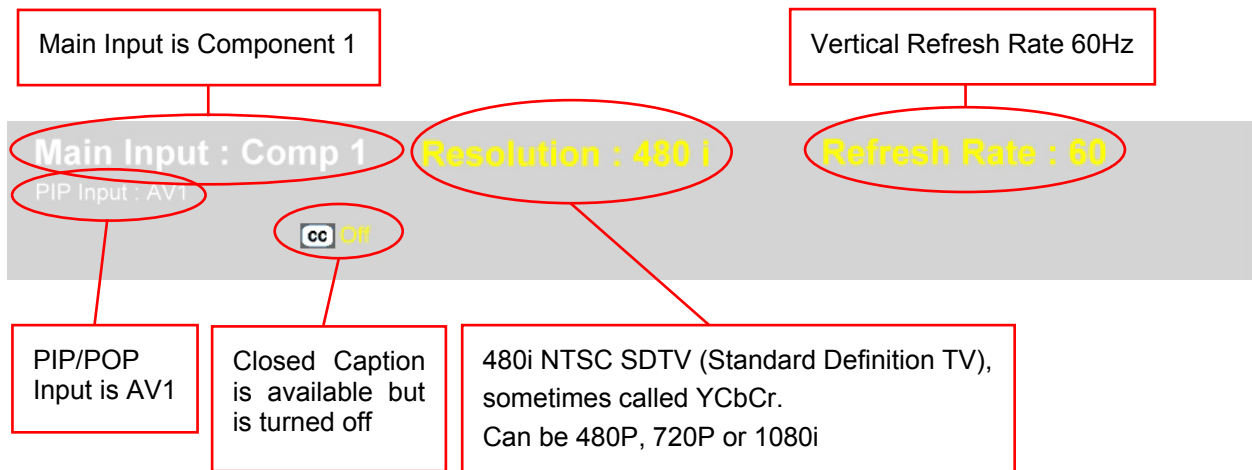

TV Input, with PIP

DTV Input, with PIP

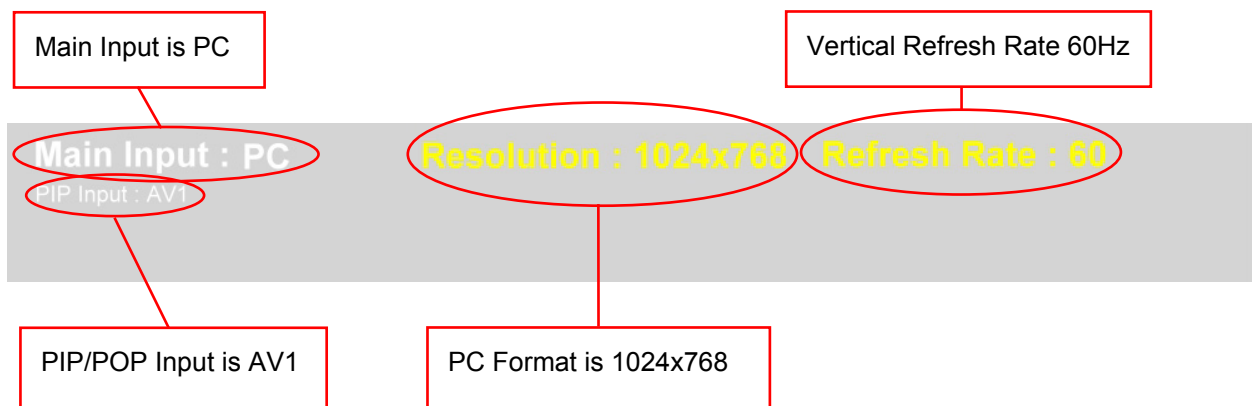

Component Input, with PIP

AV Input, with PIP

AV1 and AV2 Information Banner have similar information to the Component 1 and Component 2 Information Banners.

PC Input, with PIP

Chapter 4 Advanced Adjustment of HDTV

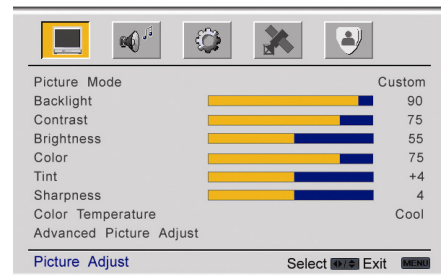

4.1 Using the On Screen Display (OSD)

The remote control or the control buttons on the right hand side of the TV can control all the function settings. The On Screen Display (OSD) allows you to adjust the save contrast, brightness and other settings. The TV will save changes made to the settings, even if the TV is turned off.

The OSD consists of several menu options: Picture Adjust, Audio Adjust, Special Features, TV Tuner Setup and Parental Controls. The main menu options may vary depending on your selected input source.

Note: Some of the main menu options may have additional submenus, i.e. the TV Rating submenu for Parental Controls.

1. Press the MENU button on the remote control or the side of the TV and the Picture Adjust menu will be shown on the screen.
2. Press the  or  button on the remote control or the VOL + or VOL – button on the side of the TV to select one of the other menu options.

Picture Adjust Audio Adjust Special Features TV Tuner Setup Parental Controls

3. Once the menu option is displayed, press the  or  button on the remote control or the CH + or CH – button on the side of the TV to select one of the items to adjust.

4. Press the  button on the remote control or the VOL – button on the side of the TV to begin adjustment of the item.
5. Press OK when finished.
6. Repeat steps 2 through 5 to adjust additional options within this menu.
7. Once the adjustments are completed press the MENU button repeatedly to exit the OSD completely.

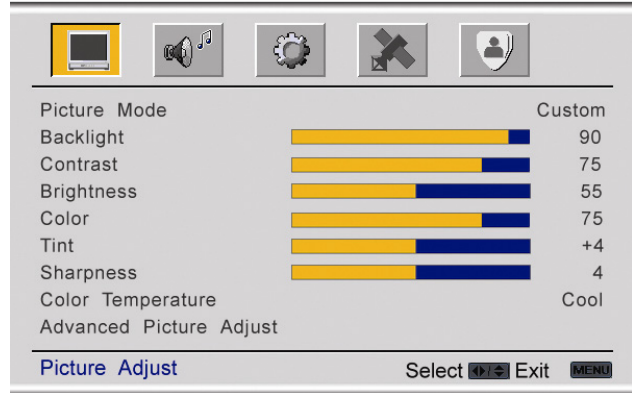

4.2 DTV / TV Input Picture Adjustment

4.2.1 Picture Mode

When the MENU button is pressed, the On Screen Display (OSD) appears on the PICTURE ADJUST page. Press the  button to highlight the Picture Mode selection.

Use the  or  button to choose from Custom, Standard, Movie and Game.

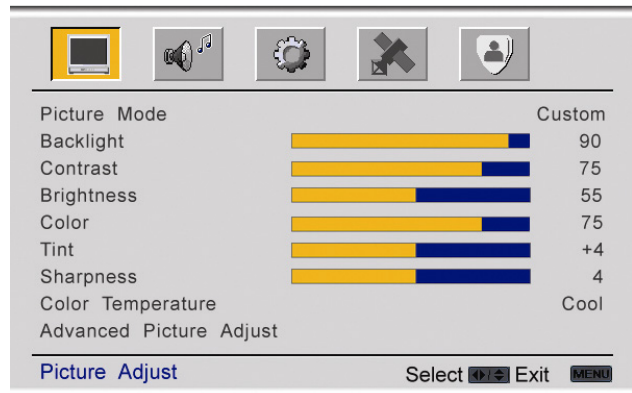

If Standard, Movie or Game is chosen for the Picture Mode, then the only Picture Adjustments available for you are for the Backlight and Color Temperature; the rest are preset.

4.2.2 Backlight

Press the  button to highlight the Backlight selection.

Press the  button to start adjusting the brightness of the Backlight and the menu page will disappear and be replaced by a small Backlight Indicator Bar so you can see the light level between the minimum and maximum available levels. Use the  or  button to adjust the level.

The Backlight level does not affect the Brightness (black level) or Contrast (white level) of the picture, it adjusts the lamp current and this affects the overall brilliance of the picture.

4.2.3 Contrast

Press the  button to highlight the Contrast selection.

Press the  button to start adjusting the contrast and the menu page will disappear and be replaced by a small Contrast Indicator Bar so you can see the contrast level between the minimum and maximum available levels. Use the  or  button to adjust the level.

The Contrast adjusts the white levels in the picture. If the contrast is too low the picture will look washed out and if the contrast is too high you will not be able to see any detail in the bright parts of a picture.

4.2.4 Brightness

Press the  button to highlight the Brightness selection.

Press the  button to start adjusting the brightness and the menu page will disappear and be replaced by a small Brightness Indicator Bar so you can see the brightness level between the minimum and maximum available levels. Use the  or  button to adjust the level.

The Brightness adjusts the black levels in the picture. If the brightness is too low you will not be able to see the detail in darker parts of the picture and if the brightness is too high the picture will look washed out.

4.2.5 Color

Press the  button to highlight the Color selection.

Press the  button to start adjusting the color and the menu page will disappear and be replaced by a small Color Indicator Bar so you can see the color level between the minimum and maximum available levels. Use the  or  button to adjust the level.

The Color adjusts the amount of color in the picture.

4.2.6 Tint

Press the  button to highlight the Tint selection.

Press the  button to start adjusting the tint and the menu page will disappear and be replaced by a small Tint Indicator Bar so you can see the tint adjustment to the left or right of the nominal position.

Use the  or  button to adjust the level.

The Tint adjusts the hue of the picture. The easiest way to set tint is to look at flesh tones and adjust for a realistic appearance. In most cases, the default middle position is correct. If people's faces look too orange try reducing the level of color first as the case of this is often too much color.

4.2.7 Sharpness

Press the  button to highlight the Sharpness selection.

Press the  button to start adjusting the sharpness and the menu page will disappear and be replaced by a small Sharpness Indicator Bar so you can see the sharpness level between the minimum and maximum available levels. Use the  or  button to adjust the level.

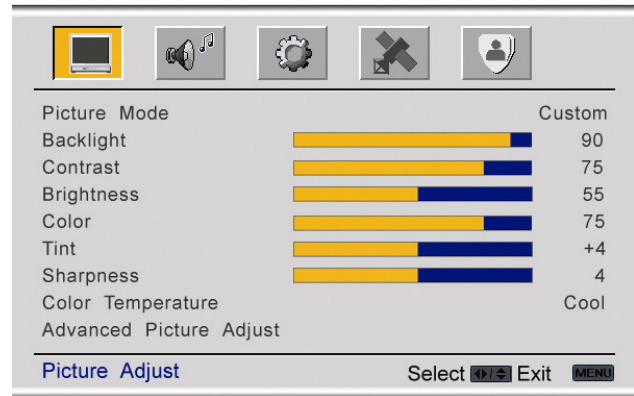

The Sharpness adjusts the sharpness of the picture.

4.2.8 Color Temperature

Press the  button to highlight the option for Color Temperature selection.

The default is NORMAL; this is the 6500K setting.

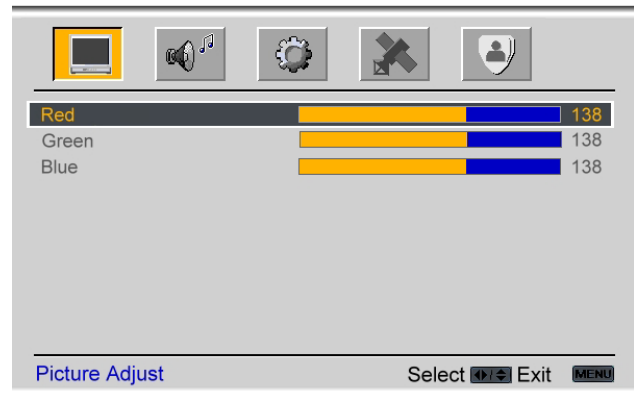

Press the  or  button if you want to choose the Cool or Warm option.

If you choose the Custom option, then a new menu will be displayed showing the primary color items, Red, Green and Blue. Press the  button to highlight the color you wish to adjust.

Press the  button to start adjusting the color and the menu page will disappear and be replaced by a small Color (Red, Green or Blue) Indicator Bar as before. Use the  or  button to adjust the color.

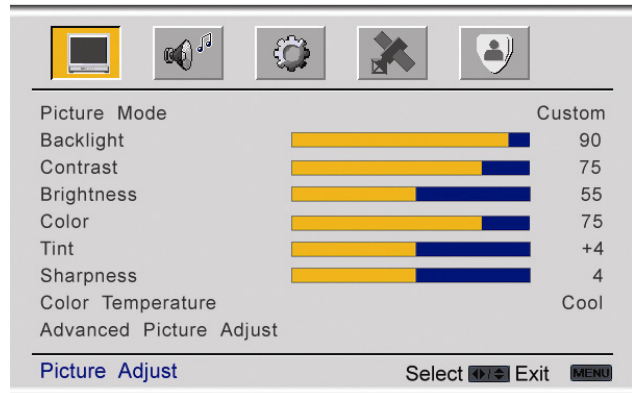

Press the OK button when finished. Repeat the procedure to adjust the other colors if desired.

4.3 Advanced Picture Adjust

When the MENU button is pressed, the On Screen Display (OSD) appears on the PICTURE ADJUST page. Press the  button to highlight the Advanced Picture Adjust selection and press OK.

A new menu is displayed showing the Advanced Picture Adjustments available on the GV47L FHD TV.

4.3.1 DNR

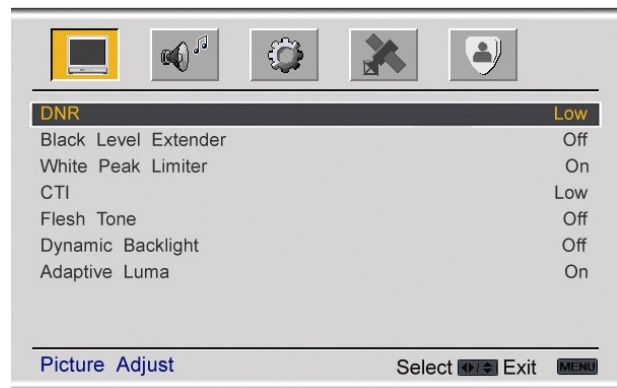

Digital Noise Reduction is used to reduce the appearance of digitizing errors caused by the compression process used to encode the program into MPEG-2 for transmission to your home. This is also referred to as MPEG Noise Reduction. Press the  button to choose from OFF, LOW, MIDDLE or STRONG.

4.3.2 Black Level Extender

Extends the ability of the HDTV to reproduce some detail that may be lost in the black areas of the picture. Press the  button to turn this feature OFF or ON.

4.3.3 White Peak Limiter

Extends the ability of the HDTV to reproduce some detail that may be lost in the white areas of the picture. Press the  button to turn this feature OFF or ON.

4.3.4 Color Transient Intensity

The GV47L automatically adjusts the picture for color errors caused by fast changing scenes and this selection allows you to set the amount of adjustment applied, to suite your taste. Press the  button to choose from OFF, LOW, MIDDLE or STRONG.

4.3.5 Flesh Tone

If you feel that your GV47L is not reproducing flesh colors correctly, even after adjusting for the correct amount of color, section 4.2.5 on page 40, you are able to make a fine adjustment using this feature. Press the  button to turn this feature On or OFF.

4.3.6 Dynamic Backlight

For some programs there may be perceived some transient changes in the contrast of the picture and the Dynamic Backlight feature may reduce this effect. Press the  button to turn this feature On or OFF.

4.3.7 Adaptive Luma

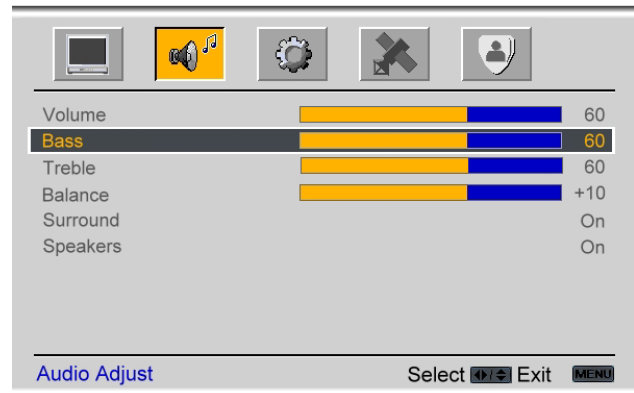

For some programs there may be perceived some transient changes in the luminance of the picture and the Adaptive Luma feature may reduce this effect. Press the  button to turn this feature On or OFF.

4.4 DTV / TV Input Audio Adjustment

4.4.1 Volume

When the MENU button is pressed, the On Screen Display (OSD) appears on the PICTURE ADJUST page. Press the  button to display the AUDIO ADJUST page.

Press the  button to highlight the Volume selection.

Press the  button to start adjusting the volume and the menu page will disappear and be replaced by a small Volume Indicator Bar so you can see the volume level between the zero and maximum available levels. Use the  or  button to adjust the level.

The Volume Indicator Bar will also appear when watching a program on your TV if the Volume button on the remote or the side of the TV is pressed.

4.4.2 Bass

Press the  button to highlight the Bass selection.

Press the  button to start adjusting the bass and the menu page will disappear and be replaced by a small Bass Indicator Bar, as before, so you can see the bass level between the zero and maximum available levels. Use the  or  button to adjust for bass boost or attenuation.

4.4.3 Treble

Press the  button to highlight the Treble selection.

Press the  button to start adjusting the treble and the menu page will disappear and be replaced by a small Treble Indicator Bar, as before, so you can see the treble level between the zero and maximum available levels. Use the  or  button to adjust for treble boost or attenuation.

4.4.4 Balance

Press the  button to highlight the Balance selection.

Press the  button to start adjusting the balance and the menu page will disappear and be replaced by a small Balance Indicator Bar, as before, so you can see the balance adjustment to the left or right of the nominal position. Use the  or  button to adjust the left/right balance.

4.4.5 Surround

Press the  button to highlight the Surround selection.

Press the  button to select for the simulated surround sound feature to be On or Off.

4.4.6 Speakers

Press the  button to highlight the Speakers selection.

Press the  button to turn the internal speakers On or Off. You may want to turn-off the internal speakers when listening to the audio through your Home Theatre System.

4.5 DTV / TV Input Special Features

The Special Features menu for DTV is slightly different from the Special Features menu for TV. This differences will be pointed out where they exist.

4.5.1 Language

When the MENU button is pressed, the On Screen Display (OSD) appears on the PICTURE ADJUST page. Press the  button until the SPECIAL FEATURES page is displayed.

Press the  button to highlight the Language selection. The default is English.

Press the  button to select Français or Español.

4.5.2 Sleep Timer

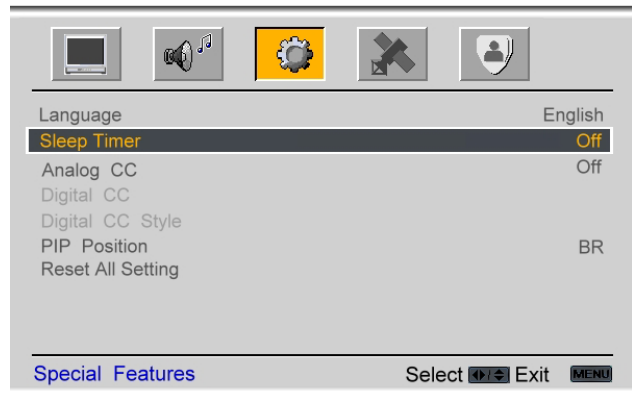

Press the  button to highlight the Sleep Timer selection. Press the  button to select the timer to turn-off the TV in 30, 60, 90 or 120 minutes.

4.5.3 Analog Closed Caption

When watching regular analog (NTSC) TV, the Analog CC feature is available in the Special Features menu.

Press the  button to highlight the Analog CC selection.

Press the  button to select CC1, CC2, CC3, CC4, TT1, TT2, TT3 or TT4. **Closed Caption for regular TV is usually CC1 or CC2.**

4.5.4 Digital Closed Caption

When watching DTV, the Digital CC feature is available in the Special Features menu.

Press the  button to highlight the Digital CC selection.

Press the  button to select Service 1.

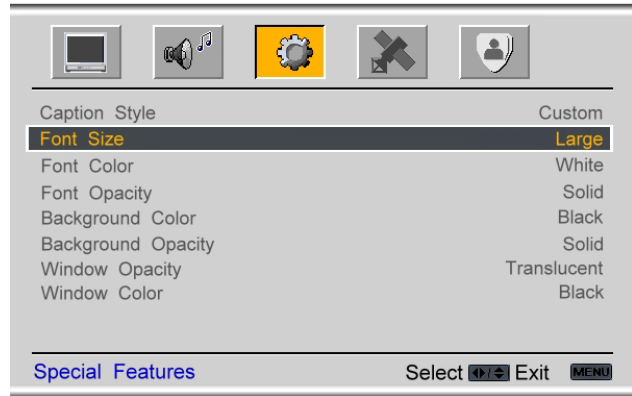

4.5.5 Digital Closed Caption Style

When selecting Digital Closed Caption you are also able to customize the look of the Closed Caption.

Press the  button to highlight the Digital CC Style selection. The default is Broadcast which means the style is the same as the broadcast channel has chosen for transmission.

Press the  button to select Custom.

The Custom page allows you to change the font size and color, the background color, and the transparency of the Closed Caption.

4.5.6 PIP Position

Press the  button to highlight the PIP Position selection.

Press the  button to select the position of the PIP screen within the main screen.

4.5.7 Reset All Settings

Press the  button to highlight the Reset All Settings selection.

Press the  button to reset the TV to the default factory settings.

Note: This does NOT reset the Parental Control Password.

4.6 TV Tuner Setup

When you first used your GV47LHDTV you will have setup your TV for regular (NTSC) TV channels using the Initial Setup screens. If you did not do this or if your setup has changed, you can do this from the TV TUNER SETUP menu.

4.6.1 Tuner Mode

When the MENU button is pressed, the On Screen Display (OSD) appears on the PICTURE ADJUST page. Press the  button to display the TV TUNER SETUP page for regular (NTSC) TV.

Press the  button to highlight the Tuner Mode selection.

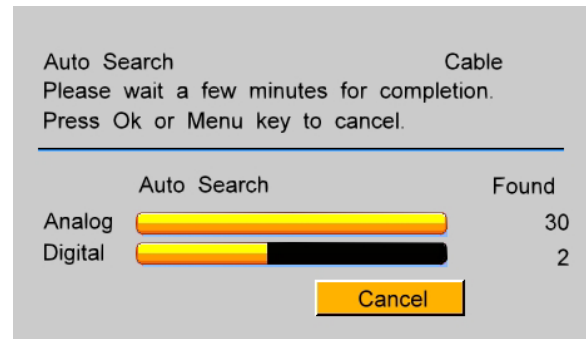

Press the  button to choose Cable or Air (Antenna) depending upon which equipment you have attached to the DTV / TV Input.

4.6.2 Auto Search

Press the  button to highlight the Auto Search selection.

Press the  button to Auto Search for TV channels available. The TV will automatically search for analog and digital channels.

4.6.3 Skip Channel

After the TV has stored all of the available TV channels in memory you will find that some channels will be too weak to watch comfortably or they may be channels you do not want to see. Select the channel you wish to remove, press the MENU and  buttons to open the TV TUNER SETUP menu and then press the  button to highlight SKIP CHANNEL. Press the OK button to select this channel to be skipped when using the CH+ or CH- button. You will still be able to select this channel using the number buttons on the remote control.

4.7 DTV Tuner Setup

When you first used your GV47LHDTV you will have setup your TV for DTV channels using the Initial Setup screens. If you did not do this or if your setup has changed, you can do this from the TV TUNER SETUP menu.

4.7.1 Tuner Mode

When the MENU button is pressed, the On Screen Display (OSD) appears on the PICTURE ADJUST page. Press the  button to display the TV TUNER SETUP page for DTV.

Press the  button to highlight the Tuner Mode selection.

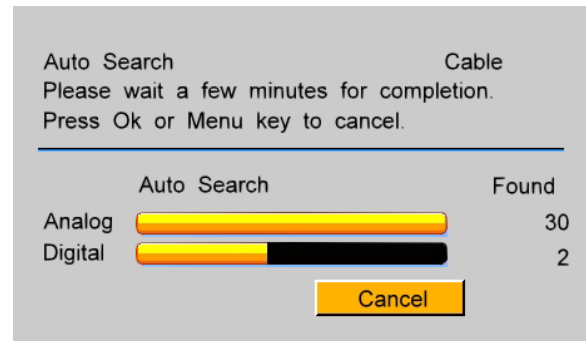

Press the  button to choose Cable or Air (Antenna) depending upon which equipment you have attached to the DTV / TV Input.

4.7.2 Auto Search

Press the  button to highlight the Auto Search selection.

Press the  button to Auto Search for TV channels available. The TV will automatically search for analog and digital channels.

4.7.3 Skip Channel

After the TV has stored all of the available DTV channels in memory you will find that some channels will be too weak to watch comfortably or they may be channels you do not want to see. Select the channel you wish to remove, press the MENU and  buttons to open the TV TUNER SETUP menu and then press the  button to highlight SKIP CHANNEL. Press the OK button to select this channel to be skipped when using the CH+ or CH- button. You will still be able to select this channel using the number buttons on the remote control.

4.7.4 Digital Audio Out

When receiving digital audio from the DTV / TV Input, the audio is output on the Optical Digital Audio connector of the rear of the TV. To configure the output for your Receiver/Amp, press the  button to highlight the Digital Audio Out selection.

Press the  button to select Dolby Digital or PCM.

4.7.5 Time Zone

Setting the correct Time Zone for your area will ensure that the correct program times are shown after pressing the GUIDE button on the remote control.

Press the  button to highlight the Auto Search selection.

Press the  button to select your area.

4.7.6 Daylight Saving

As for Time Zone, setting the daylight saving time for your area will ensure that the correct program times are shown after pressing the GUIDE button on the remote control.

4.8 DTV / TV Input Parental Control

4.8.1 Parental Lock Enable

If you want to restrict certain channel and program viewing, you can do this by turning on the Parental Control. Selected programs, movies and channels can then be made available only after an authorized password has been entered and accepted by the TV.

When the MENU button is pressed, the On Screen Display (OSD) appears on the PICTURE ADJUST page. Press the  button to display the PARENTAL CONTROL page.

Press the  button to highlight the Parental Lock Enable selection.

Press the  button to turn it on or off.

A panel will appear requesting that you input the password before the TV will continue with your request. The default password set in the factory is 0 0 0 0. If you are going to use the Parental Control feature you should change the password.

Note: Make sure you write down and store the new password in a secure place. The Reset All Settings feature (see page 47) does NOT reset the password.

4.8.2 TV Rating

Follow the procedure in the previous section 4.8.1 to display the Parental Control menu and then press the  button to highlight the TV Rating selection.

Press the  button and the Block TV Rating panel will be displayed.

In the Block TV Rating panel you can customize the program blocking of the following TV ratings:

- Y – All children
- Y7 – Older children
- G – General audience
- PG – Guidance suggested
- 14 – Strongly cautioned
- MA – Mature audience

You can also customize the TV ratings for the following content:

- FV – Fantasy violence
- D – Sexual dialog
- L – Adult language
- S – Sexual situations
- V - Violence

Press the  or  button to navigate through the TV rating options. Press the  button to block (locked) or allow (unlocked).

4.8.3 Movie Rating

Press the  button to highlight the Movie Rating selection.

Press the  button and the Block Movie Rating panel will be displayed.

In the Block Movie Rating panel you can customize the program blocking of the following Movie ratings:

- G – General audience
- PG – Parental guidance suggested
- PG-13 – Recommended for children 13 years of age or older
- R – Mature audience
- NC-17 – No one under 17 years of age
- X – No one under 17 years of age

Press the  or  button to navigate through the Movie rating options. Press the  button to block (locked) or allow (unlocked).

4.8.4 Blocked Unrated Programming

Follow the procedure in the previous section 4.8.1 to display the Parental Control menu and then press the  button to highlight the Block Unrated TV selection.

Press the  button to turn-on or turn-off the blocking of programming that does not have a rating.

4.8.5 Change the Password

Press the  button to highlight the Access Code Edit selection.

Press the  button and the new Password panel will be displayed.

Enter the 4-digit password in the New orange highlighted block using the number buttons on the remote. Press the  button to highlight the Confirm block and enter it a second time to confirm you entered it correctly. Press OK when finished.

If both numbers are not the same, a warning panel will display to inform you that passwords did not match (the old password will remain in effect) and for you to try again. Press MENU on the remote to return to the Access Code Edit panel.

Note: Make sure you write down and store the new password in a secure place. The Reset All Settings feature (see page 47) does NOT reset the password.

4.9 Video Input Picture Adjustment

The Picture Adjust menu operates in the same way for Video Inputs (Component and AV) as for the DTV / TV input in section 4.2. The menu difference is that there is no icon along the top for DTV / TV adjustments.

4.10 Video Input Audio Adjustment

The Audio Adjust menu operates in the same way for Video Inputs (Component and AV) as for the DTV / TV input in section 4.4. The menu difference is that there is no icon along the top for DTV / TV adjustments.

4.11 Video Input Special Features

The Special Features menu operates in the same way for Video Inputs (Component and AV) as for the TV input in section 4.5. The menu difference is that there is no icon along the top for TV adjustments.

4.12 Video Input Parental Control

The Parental Control menu operates in the same way for Video Inputs (Component and AV) as for the DTV / TV input in section 4.8. The menu difference is that there is no icon along the top for DTV / TV adjustments.

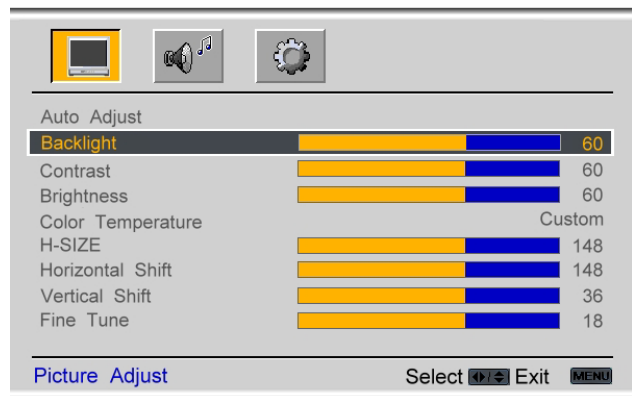

4.13 PC Input Picture Adjustment

The Picture Adjust menu operates in the same way for the PC Input as for the DTV / TV input in section 4.2 for Backlight, Contrast, Brightness and Color Temperature.

4.13.1 Auto Adjust

When the MENU button is pressed, the On Screen Display (OSD) appears on the PICTURE ADJUST page. Press the button to highlight the Auto Adjust selection.

Press the button for the LCD HDTV to adjust to the PC signal timing automatically.

4.13.2 H-SIZE

Press the button to highlight the H-Size selection.

Press the button to start adjusting the horizontal size of the picture. Use the or button to adjust the horizontal size.

4.13.3 Horizontal Shift

Press the button to highlight the Horizontal Shift selection.

Press the button to start adjusting the horizontal position of the picture. Use the or button to adjust the horizontal position.

4.13.4 Vertical Shift

Press the button to highlight the Vertical Shift selection.

Press the button to start adjusting the vertical position of the picture. Use the or button to adjust the vertical position.

4.13.5 Fine Tune

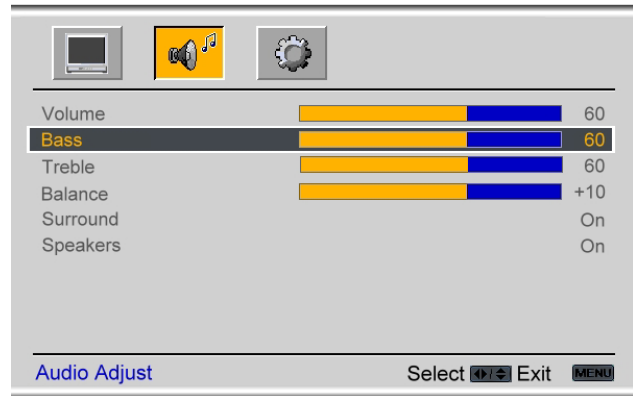

Press the button to highlight the Fine Tune selection.

Press the button to start tuning the to the PC signal. Use the or button to adjust the tuning.

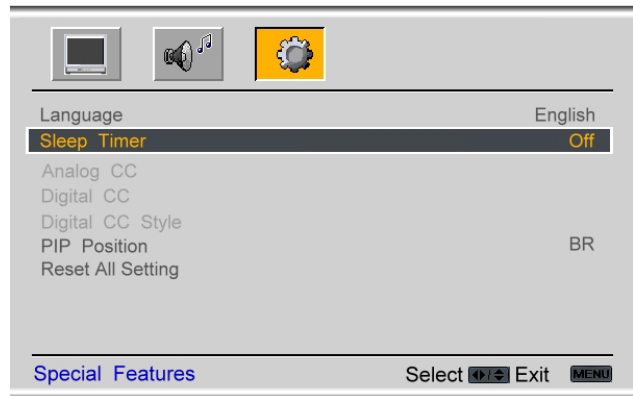

4.14 PC Input Audio Adjustment

The Audio Adjust menu operates in the same way for the PC Input as for the DTV / TV input in section 4.4. The menu difference is that there are no icons along the top for DTV / TV and Parental Control adjustments.

4.15 PC Input Special Features

The Special Features menu operates in the same way for the PC Input as for the DTV / TV input in section 4.5. The menu difference is that there is no icon along the top for TV adjustments and no Closed Caption.

4.15.1 Understanding Viewing Features

Your LCD HDTV features four viewing modes and Picture-In-Picture (PIP)/Picture-by-Picture (POP) mode. You can switch these modes using the remote control.

4.15.2 Viewing Modes

Normal Mode

The original 4:3 aspect ratio (1.33:1 source) is preserved, so black bars are added to the left and right of the display image. Standard TV broadcasts are displayed with a 4:3 Aspect Ratio. Movies in 4:3 Aspect Ratio may be referred to as pan-and-scan or full frame. These movies were originally filmed in 16:9 (widescreen), and then modified to fit a traditional TV screen (4:3).

Wide Mode

When watching a standard broadcast or full-frame movie in this mode, the display image is stretched proportionately to fill the TV screen. When watching a widescreen (1.78:1 source) program or movie, the display image fills the TV screen. If you are watching a widescreen (1.85:1 or 2.35:1 source) program or movie, there will still be black bars at the top and bottom.

Zoom Mode

When watching a widescreen (1.78:1, 1.85:1, or 2.35:1 source) program or movie, the display image is zoomed proportionally to fill the width of the screen. The top and bottom are cut off to remove most of the source material's black bars. This mode is good for programs or movies with sub-titles.

Panoramic Mode

When watching a standard broadcast or full frame movie in this mode, the 4:3 Aspect Ratio (1.33:1 source) display image is stretched horizontally on the left and right sides to fill the TV screen. The center of the image is not stretched.

Note: Viewing modes are saved based on input. For example, you last watched a DVD in widescreen mode and then watched TV in standard mode. When you switch back to DVD input, the viewing mode will return to widescreen.

4.15.3 Picture-In-Picture(PIP)/Picture-by-Picture(POP)Mode

Your TV features PIP mode so you can watch two pictures at the same time. When PIP is turned on, you can display two pictures at one time. One picture is displayed as the full screen (main screen) and the other picture is displayed in a small window (sub screen). The sub-screen can be set to small or large.

See below for detailed information regarding the PIP sources.

| MAIN \ SUB | SUB | | | | | | | | | |
|-------------|-----|----|-----|-----|-------------|-------------|--------|--------|-----|---|
| | DTV | TV | AV1 | AV2 | Component 1 | Component 2 | HDMI 1 | HDMI 2 | RGB | |
| DTV | | | | | ✓ | ✓ | | | | ✓ |
| TV | | | | | ✓ | ✓ | ✓ | ✓ | | ✓ |
| AV1 | | | | | ✓ | ✓ | ✓ | ✓ | | ✓ |
| AV2 | | | | | ✓ | ✓ | ✓ | ✓ | | ✓ |
| Component 1 | ✓ | ✓ | ✓ | ✓ | | | ✓ | ✓ | | |
| Component 2 | ✓ | ✓ | ✓ | ✓ | | | ✓ | ✓ | | |
| HDMI 1 | | ✓ | ✓ | ✓ | ✓ | ✓ | | | | ✓ |
| HDMI 2 | | ✓ | ✓ | ✓ | ✓ | ✓ | | | | ✓ |
| RGB | ✓ | ✓ | ✓ | ✓ | | | ✓ | ✓ | | |

“✓” – Indicates which inputs are available for PIP and POP modes.

*When HDMI is used for the Sub-Screen it cannot support 1080i.

4.15.4 Adjusting Basic PIP/POP Settings

The PIP channel is independent of the main TV channel. To change the PIP channel, press the PIP CH + or - button on the remote control.

Repeated pressing of the PIP button will cycle through PIP, POP and Off.

Repeated pressing of the PIP INPUT button will cycle through the inputs for PIP. This button has no effect when PIP is off.

Press the PIP SIZE button to alternate between Small and Large PIP sizes.

You can swap the program that is in the main picture with the program in the PIP sub-picture. To swap the main picture program with the PIP sub-picture program, press SWAP on the remote control. If you press SWAP again, it will return the program to the main picture. This works the same if you are in the Picture-by-Picture (POP) mode.

4.15.5 Setting the Sleep Timer

The Sleep Timer lets you set a time delay to turn off the LCD HDTV automatically.

To set the Sleep Timer using the remote control:

1. Press the SLEEP button on the remote control. The Sleep Timer appears in the center of your screen.
2. Press the SLEEP button one or more times to select the time you want. The choices are 30, 60, 90 or 120 minutes.

To turn off the sleep time using the remote control, press the SLEEP button repeatedly until Off appears on the screen.

4.16 Programming the VIZIO Universal Remote Control

You can program the remote control to work with up to four different components. Listed below are the steps for programming your VCR, Cable Box and DVD Player.

4.16.1 Programming for VCR

1. Manually turn on the VCR.
2. Press the VCR button on the remote control.
3. Press and hold the SETUP button until the LED LIGHT flashes twice.
4. Find the programming code for your VCR in the code list in the back of this book and enter it using the Number Buttons. If the code is accepted, the LED flashes twice after the last digit is entered.
If the LED does not flash twice, repeat Steps 2 through 4 with the next code listed for the component and manufacturer.
5. Point the remote control at the VCR and press the POWER button. The VCR will turn off.

Note:

- a) If your VCR does not respond, try all the codes for your VCR brand. If the codes do not work, or your brand is not listed, see "Searching for Component Codes."
- b) Sometimes a code listed will only include limited functions. Try other codes that may include more functionality.

4.16.2 Programming for Cable Set-Top Box

1. Manually turn on the Cable Box.
2. Press the CBL button on the remote control.
3. Press and hold the SETUP button until the LED LIGHT flashes twice.
4. Find the programming code for your Cable Box in the code list in the back of this book and enter it using the Number Buttons. If the code is accepted, the LED flashes twice after the last digit is entered.
If the LED does not flash twice, repeat Steps 2 through 4 with the next code listed for the component and manufacturer.
5. Point the remote control at the Cable Box and press the POWER button. The Cable Box will turn off.

Note:

- a) If your Cable Set-Top Box does not respond, try all the codes for your brand. If the codes do not work, or your brand is not listed, see "Searching for Component Codes."
- b) Sometimes a code listed will only include limited functions. Try other codes that may include more functionality.

4.16.3 Programming for DVD Player

1. Manually turn on the DVD Player.
2. Press the DVD button on the remote control.
3. Press and hold the SETUP button until the LED LIGHT flashes twice.
4. Find the programming code for your DVD player in the code list in the back of this book and enter it using the Number Buttons. If the code is accepted, the LED flashes twice after the last digit is entered.
If the LED does not flash twice, repeat Steps 2 through 4 with the next code listed for the component and manufacturer.
5. Point the remote control at the DVD Player and press the POWER button. The DVD Player will turn off.

Note:

- a) If your DVD player does not respond, try all the codes for your brand. If the codes do not work, or your brand is not listed, see “Searching for Component Codes.”
- b) Sometimes a code listed will only include limited functions. Try other codes that may include more functionality.

4.16.4 Searching for Component Codes

If you cannot find the manufacturer in the component list or the program code does not work, you can use the remote control to search for the correct component code.

To search for a component code:

1. Turn on the component.
2. Press the matching component button on the remote control.
3. Press and hold the SETUP button until the LED flashes twice.
4. Press 9 9 1. The LED flashes twice.
5. Point the remote control at the component and then alternate between pressing the POWER button and the component button on the remote control until the component turns off. If the component still does not respond, clear the component button, then repeat the search procedure.

4.17 Using a Cable or Satellite Remote

Your VIZIO remote uses codes 11758 and 10178 to work your LCD HDTV. To use a cable or satellite remote to work the LCD HDTV, refer to your cable or satellite remote user guide for more information on how to program the remote. If your cable or satellite remote uses a 5-digit code (like most Direct TV units), first try 11758 and then, if that does not work, 10178. If your cable or satellite remote uses a 4-digit code, try 1758 and then 0178 as an alternative. If your cable or satellite remote uses a 3-digit code (EchoStar or Dish Network for example), use code 627.

Note: Some buttons may not function as expected on your cable or satellite remote. Typically power, volume and mute will work.

Chapter 5 Maintenance and Troubleshooting

5.1 Maintenance

Important

1. Make sure that the power cable is removed from the socket before cleaning the TV.
2. Do not use volatile solvent (such as toluene, rosin and alcohol) to clean the TV. Such chemicals may damage the housing, screen glass and remote control, and cause paint to peel.

Cleaning the Housing and Remote Control

1. Use the VIZIO soft cloth (included) for cleaning.
2. If the housing or remote control is seriously contaminated, use a soft cloth moistened with diluted neutral cleaner to clean the display. Wring water out of the cloth before cleaning to prevent water from penetrating into the housing. Wipe the display with a dry cloth after cleaning.

Cleaning the Screen

1. Use the VIZIO soft cotton cloth (included) to gently clean the screen.
2. The screen glass is very fragile. Do not scrape it with any sharp object. Do not press or tap the screen to avoid cracking. When the screen is seriously contaminated, use a soft cloth moistened with diluted neutral cleaner to clean the display. Wring water out of the cloth before cleaning to prevent water from penetrating into the housing. Wipe the display with a dry cloth after cleaning.

5.2 Troubleshooting Guide

If the TV fails or the performance changes dramatically, check the display in accordance with the following instructions. Remember to check the peripherals to pinpoint the source of the failure. If the display still fails to perform as expected, contact the VIZIO for assistance by calling 1-714-668-0588 or e-mail us at techsupport@vinc.com.

| Problem | Solution |
|-------------------------|--|
| No power. | <p>Make sure the power button is ON (White VIZIO Logo).</p> <p>Make sure AC power cord is securely connected to the AC socket.</p> <p>Plug another electrical device (like a radio) to the power outlet to verify that the outlet is supplying the proper voltage.</p> |
| No sound. | <p>Check your audio connection</p> <p>Press MUTE on the remote control again, so that MUTE disappears from the screen</p> <p>Check your audio settings, your TV audio may be set to SAP, min or speakers off.</p> <p>Press the Volume + (Up) key on your remote control</p> <p>Make sure that headphones are not connected</p> |
| If the screen is black. | Check your input connections. |

| Problem | Solution |
|--|---|
| Power is ON but no screen image. | <p>Make sure the video cable supplied with the TV is secured to the correct video output port on the back of the VCR and the TV. Make any cable you have attached to the TV is secured to the correct output your Set-Top Box, DVD, etc.</p> <p>Adjust brightness and contrast.</p> <p>Check Source settings.</p> |
| Wrong or abnormal colors appear. | <p>If any colors (red, green, or blue) are missing, check the video cable to make sure it is securely connected.</p> |
| Control buttons do not work. | <p>Press only one button at a time.</p> |
| Remote Control does not work. | <p>Make sure batteries are inserted correctly</p> <p>Batteries could be weak.</p> <p>Make sure you have selected TV on the remote.</p> |
| There appears to be image quality issues. | <p>For best image quality, view HD wide screen programs where possible. If HD content is not available view "Standard Definition" from a digital source. Standard, analog TV will always be noticeably inferior to HD because your digital flat panel TV has video that is many times better than old TV's and so you can see interference and deficiencies you did not know you had.</p> |
| You cannot see a picture. | <p>Make sure that the power cord is plugged into a grounded electrical outlet.</p> <p>Make sure that the power button is turned on.</p> <p>Make sure that the selected input source is connected to a working input source.</p> <p>If your TV is connected to your computer in RGB or HDMI mode, press any key on your keyboard to "wake" your computer.</p> |
| You see a distorted picture or hear unusual sound. | <p>You may be getting interference from electrical appliances, cars, motorcycles, or fluorescent lights. If you have not mounted it on the wall, try moving your TV to another location to see if this is the cause of the problem.</p> |
| The picture has abnormal patterns. | <p>Make sure that the input source cable is attached securely and correctly to the back of your TV.</p> <p>Make sure that the video input source is within the range of your TV. Compare the video input source's specifications with your TV specifications.</p> |
| The display image does not cover the entire screen. | <p>If you are using RGB mode, make sure that H Size and V Position in the On Screen Display (OSD) are set correctly.</p> <p>If you are using TV, AV1, AV2 or Component with 480i input, use the WIDE button on the remote control to scroll through various screen modes.</p> |
| You can see a picture but you cannot hear sound. | <p>Make sure that the volume is not turned down.</p> <p>Make sure that the sound is not muted.</p> <p>Make sure that your audio input source cables are connected securely and correctly.</p> |
| The TV has pixels that are always dark or colored. | <p>Your LCD HDTV is manufactured using an extremely high level of precision technology, however, sometimes some pixels of your LCD HDTV may not display. Pixel defects within industry specifications are inherent to this type of product and do not constitute a defective product.</p> |
| You see "noise" or "trash" on the screen. | <p>When your LCD HDTV's digital capabilities exceed a digital broadcast signal, the signal is up-converted (increased) to match your TV's display capabilities. Up-converting can cause noise or trash.</p> |
| You switch to a different input and the volume changes. | <p>The TV remembers the volume level from the last time you adjusted it. If the sound level is higher or lower from another source, then the loudness will change.</p> |
| You switch to a different input and the screen size changes. | <p>The TV remembers the viewing mode from the last time you used a particular input (AV1, AV2, Component 1, Component 2, HDMI 1, HDMI 2 and TV).</p> |

| | |
|-----------------------------------|---|
| Tips for High-Definition Users. | The LCD HDTV is an ideal platform for viewing High Definition Content. Best Image Quality will be achieved by the HDMI Input, then YPbPr, then RGB. However, due to variances in broadcast practices, it is possible some image distortions can occur. |
| Tips for Letterbox Content Users. | Letterboxed (or "Widescreen") versions of DVD movies are most commonly formatted for standard 4:3 Televisions. The LCD HDTV has the capability of expanding this content so the entire screen is filled at the expense of image accuracy. To use this function, press the "ZOOM" key on the remote control and cycle among the available options. |

5.3 Telephone & Technical Support

Products are often returned due to a technical problem rather than a defective product that may result in unnecessary shipping charges billed to you. Our trained support personnel can often resolve the problem over the phone. For more information on warranty service or repair, after the warranty period, please contact our Support Department at the number below.

Customer support and quality service are integral parts of VIZIO's commitment to service excellence.

For technical assistance contact our VIZIO Technical Support Department via email or phone.

E-mail: techsupport@vinc.com

Tel: (714)668-0588

Hours of operations:

6:00am – 6:00pm PST Monday – Friday

10:00am – 2:00pm PST Saturday – Sunday

Please have your VIZIO model number, serial number and date of purchase available before you call.

5.5 FCC Class B Radio Interference Statement

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

Notice:

1. The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
2. Shielded interface cables and AC power cord, if any, must be used in order to comply with the emission limits.
3. The manufacturer is not responsible for any radio or TV interference caused by unauthorized modification to this equipment. It is the responsibilities of the user to correct such interference.

Chapter 6 Miscellaneous Information

6.1 Specifications

| Specifications | |
|--------------------------|---|
| Panel | 47" Diagonal, 16:9 Aspect Ratio |
| Resolution | 1920 x 1080 pixels |
| Pixel (Dot) Pitch | 0.542mm (H) x 0.542mm (V) |
| Signal Compatibility | 1080P (Full HD) , 1080i (HDTV) , 720P (HDTV) , 480P (EDTV) 480i (SDTV) |
| Colors | 16.77 Million |
| Brightness | 500 cd/m ² (typical) |
| Contrast | 800:1 (typical), 1600:1 with Dynamic Contrast Ratio |
| Viewing Angle | Horizontal and Vertical 178° (typical) |
| Inputs | 1x Co-axial RF (ATSC/QAM/NTSC), 2x HDMI™** with HDCP (1 with Stereo Audio RCA), 2x Component YPbPr plus Stereo Audio, 1x RGB PC plus Stereo Audio, 1x S-Video plus Stereo Audio (shared in AV2), 2x Composite Video plus Stereo Audio (AV1 & AV2) |
| Outputs | 1x 5.1 Audio from DTV input only (SPDIF Optical), 1x Stereo Audio (RCA) |
| Features | PIP, POP, Noise Reduction, CC, V-Chip, 3D Comb Filter, Zoom, Freeze, Motion Adaptive De-Interlace, Picture Enhancement, MPEG-2 Decoding via DTV input, NTSC Video decoding via Video (AV, S-Video or Component), Progressive Scan Video via HDMI™**, Component or RGB, HDTV via HDMI™**, Component or RGB (Set-Top Box required), Computer 640x480, 800x600, 1024x768, 1280x1024, 1360x768 via RGB, Sound Enhancement |
| Speakers | 2.1 Built-in; 10W Left + 10W Right + 20W Sub-Woofer |
| Panel Life | 50,000 hours to half the original brightness |
| Power | |
| Input | IEC Connector for direct power line connection |
| Voltage Range | 100 ~ 240Vac at 50/60Hz |
| Power Consumption | 340W average |
| Environmental Conditions | |
| Operating | Temperature: 5°C~35°C, Relative Humidity: 20~80%, Altitude: 0~14,000 ft |
| Non-Operating | Temperature: -20°C~50°C, Relative Humidity: 10~90%, Altitude: 0~40,000 ft |
| Dimensions | 44.53" W x 31.42" H x 10.63" D with stand; 44.53" W x 29.76" H x 4.53" D without stand |
| Net Weight | 89 lbs with stand |
| Gross Weight | 104 lbs |
| Certifications | CSA, FCC Class B |

*Product specifications may change without notice or obligation.

6.2 Glossary - Standard Definitions

Analog TV: Today's TV system using radio frequency waves to transmit and display pictures and sound.

Aspect Ratio (4x3): Traditional TV "aspect ratio", that is, the screen's width as compared to its height. For example, a "32 inch TV screen" would be 25 inches wide and 19 inches tall.

Aspect Ratio (16x9): "Wide screen TV" aspect ratio which is more like a movie screen than a traditional TV. For example, a "32 inch TV screen" would be 28 inches wide and 16 inches tall.

Digital TV (DTV): Television delivered and displayed using radio frequency waves that contain information that is digitally encoded for improved quality and efficiency.

Enhanced Definition TV (EDTV): A better digital television transmission than SDTV with at least 480P, in a 16x9 or 4x3 display and Dolby digital surround sound. 480P is the quality used by most DVD players. EDTV provides 300-400,000 pixels.

HDTV Monitor (sometimes called HDTV Ready): A set that can display HDTV programming if you have a separate HDTV tuner, HD Cable Set-Top Box or HD Satellite Set-Top-Box Receiver.

HDTV Tuner (also decoder, receiver, set-top box): A device capable of receiving and outputting HDTV signals for display. It may be stand-alone or integrated in the set.

High-Definition Television (HDTV): The best quality picture, wide screen (16x9) display with at least 720 progressively scanned lines (720P) or 1080 interlaced lines (1080i) and Dolby digital surround sound. HDTV provides 900,000-2.1 million pixels.

Integrated HDTV: An HDTV that has the digital tuner built into the set. It does not need a separate set-top box to receive over-the-air DTV signals.

Interlace Scan: A way to scan vertical lines onto a TV picture by scanning all the odd lines first, then filling the in the even lines (this happens instantaneously).

Plug-and-Play or Digital Cable Ready: A DTV or other device for digital cable consumers that plugs directly into the cable jack and does not require a separate set-top box. Plug-and-Play TV owners must obtain a CableCARD from their cable company in order to view scrambled programming services.

Progressive Scan: A way to scan vertical lines onto a TV picture by scanning all the lines consecutively (progressively).

Standard Definition TV (SDTV): Basic digital television transmission that may be displayed with fewer than 480 progressively scanned lines (480P) in 16 x 9 or 4 x 3 format. 480 interlaced (480i) is the quality of today's analog TV system.

Source: Buying a Digital Television, CEA, HDTV Guide, 2005

Note: The Federal Communications Commission (FCC), the Consumer Electronics Association (CEA) and the Consumer Electronics Retailers Coalition (CERC) have made a new tip sheet available for digital television (DTV) retailers to reproduce and distribute to consumers on the sales floor. The file may be downloaded online at www.dtv.gov. While you're there, check out the other useful information in the FCC is making available to consumers interested in learning more about the analog to digital transition.

6.4 Limited Product Warranty

Please read this warranty card carefully, it is a “ONE-YEAR LIMITED WARRANTY” on parts and labor and is only valid when purchased from an Authorized Reseller, only on new and non-refurbished product, and available to customers in the Continental US, Alaska, Hawaii and Puerto Rico. See below for the VIZIO Extended Service warranty.

VIZIO's Responsibility

VIZIO Displays purchased in the United States are warranted to be free from defects in materials or workmanship for a period of one (1) year from the date of their original retail purchase. If the unit fails to conform to this warranty, we will service the monitor using new or refurbished parts.

Service Labor

During a period of one (1) year from the effective warranty date, VIZIO will provide, when needed, service labor to repair a manufacturing defect at its designated Service Center. To obtain warranty service in the United States, you must first call our Customer Support at (714) 668-0588. The determination of service will be made by VIZIO Customer Support. PLEASE DO NOT RETURN YOUR UNIT TO VIZIO WITHOUT PRIOR AUTHORIZATION.

Parts

New or remanufactured replacements for defective parts will be used for repairs by VIZIO at its designated Service Center for one (1) year from the effective warranty date. Such replacement parts are warranted for the remaining portion of the original warranty period.

Service

During the one (1) year warranty period, VIZIO will, at its option and sole discretion, repair or replace defective parts, including replacement of the entire Panel. The Customer will be required to ship the unit to the Service Center indicated at the time Customer Support is contacted to make the necessary repairs, you are responsible for all transportation charges to and from the service facility. VIZIO is not responsible for the de-installation or re-installation of the unit.

Packaging and Shipping Instruction

When you send the product to an authorized VIZIO service facility you must use the original carton box and packing material or an equivalent as designated by VIZIO

Not Covered

This warranty does not cover defects, malfunctions or failures resulting from shipping or transit accidents, abuse, misuse, operation contrary to furnished instructions, operation on incorrect power supplies, operation with faulty associated equipment, modification, alteration, improper servicing, tampering or normal wear and tear or TVs on which the serial number has been removed or defaced. Image Sticking caused by operating at excessive brightness levels for extended periods or mishandling are not covered by this warranty.

ANY IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE SHALL BE LIMITED IN DURATION TO THE PERIOD OF TIME SET FORTH ABOVE. OUR LIABILITY FOR ANY AND ALL LOSSES AND DAMAGES RESULTING FROM ANY CAUSE WHATSOEVER, INCLUDING OUR NEGLIGENCE, ALLEGED DAMAGE OR DEFECTIVE GOODS, WHETHER SUCH DEFECTS ARE DISCOVERABLE OR LATENT, SHALL IN NO EVENT EXCEED THE PURCHASE PRICE OF THE DISPLAY. WE SHALL NOT BE RESPONSIBLE FOR LOSS OF USE, COMMERCIAL LOSS OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This is the only warranty applicable; no one is authorized to extend or modify it or to grant any other warranty.

VIZIO retains the right to assess all warranty claims and to determine if damages are covered by the warranty. In case of a claim that is not covered by the warranty, you will be contacted to determine whether VIZIO should repair the damage for a fee or whether the product should be returned to you as received by the repair center.

Owner's Responsibility

Effective Warranty Date

Warranty begins on the date of sale to the end user. To ensure warranty service, keep the dated bill or sale receipt as evidence of the purchase date.

Warranty Service

For warranty service information, contact VIZIO Customer Support at (714) 668-0588, 7:30 am to 5:30 pm PST or visit www.vizioce.com. Parts and service labor that are VIZIO's responsibility (see above) will be provided without charge. Other service is at the owner's expense. You must provide the model, serial number and date of purchase. Before you ask for warranty service, read your User Manual. You might avoid a service call.

Warranty conditions are subject to change, for latest Warranty Terms and Conditions and additional information regarding your warranty, please see complete details online at www.VIZIOCE.com.

6.4.1 VIZIO Extended Service Warranty

Protect your investment beyond the standard warranty and experience piece of mind with VIZIO's Extended Service Warranty.

Depending on your model, plans are offered for 2-5 years. Visit www.vizioce.com or call 1-800-988-4196 to purchase a plan today.
