ADVANTAGE TOSHIBA

- >> HD Dynamic Contrast feature continually analyzes picture information and enhances those parts of the picture with the most detailed information. This results in a sharper, deeper image with rich colors and a more film like image.
- >> PixelPure AT™ (Adaptive Technology) includes Motion Adaptive De-Interlacing, Adaptive MPEG Processing, Adaptive Contrast Enhancement, and Adaptive Color Enhancement, all critical elements to deliver the consistently high quality picture expected from a Toshiba Television.
- >> CableClear™ DNR+ utilizes the Digital 3DYC Comb Filter to compare frames and determine the existence and extent of video noise. It then applies the needed amount of digital video noise reduction, and the appropriate sharpness adjustment to keep the picture clear. This feature works on R/F and Video inputs and can be controlled by input.
- >> High Definition MultiMedia Interface (HDMI™) is the next generation of DVI. It includes the DVI digital video signal, and multi-channel digital audio signals on a single cable thus eliminating the need of a multiple cable hookup.
- >> Sleek Cinema Series Cabinetry looks great in any room whether the set is off or on.
