¹ More than 94% of the 1080 vertical signal is displayed. Due to variances in program productions and transmissions not all of the 1080 signal is suitable for display.

² Compared to previous generation panels

³ This television is capable of receiving over the air digital and analog signals (ATSC and NTSC). Analog cable channels that are not scrambled may also be received.

⁴ DVI-HDTV (HDCP) inputs are compatible with the digital RGB video portion of HDMI signals (adapter not included).
