52RV53U

Upgrade your viewing experience to 1080p True HD with the 52RV53U, featuring DynaLight™ dynamic backlight control, offering significant improvement in black levels for deep images.

DynaLight™ Backlight Control utilizes advanced image processing to monitor the brightness of each video frame, and adjust the backlight intensity accordingly. This precision creates seamless transitions with deep blacks for increased detail and depth analysis.

PixelPure® 4G takes advantage of the internal 14-bit video processor to reach 4,096 levels of gradation, producing a smooth and natural picture.

CineSpeed™ LCD panels have the 8ms or faster response speed necessary for cleaner high-action home theater images. A wide viewing angle ensures that you'll have the best seat in the house.

Gaming Mode enhances the gaming experience by reducing the amount of time it takes for the signal to travel from the game controller to the TV.

Take full advantage of the large Hi Def image by connecting a PC through the **High Res PC Input**.
