

Philips
projection HDTV with
Pixel Plus

60"
DLP™

60PL9200D

Turn up your viewing experience with Integrated HD DLP Projection TV

Be an eyewitness

- High definition Projection TV with DLP™ technology
- Pixel Plus for better details, depth and clarity
- Enjoy HDTV that's truer than anything you've seen before
- 3D combfilter separates colors for a razor-sharp image

Unrivalled audio performance

- Dolby Digital for movies or concerts in full surround sound

One touch convenience

- PiP allows watching a second source simultaneously
- Auto Picture to personalise your viewing
- Auto Sound uses pre-defined sound settings for better sound
- A choice of widescreen modes to adjust the picture shape

Leading interface for digital quality audio/video

- HDMI for full digital High Definition connection
- Component Video Input for top quality playback and recording

PHILIPS

Technical specifications

Picture/Display

- **Aspect ratio:** 16:9
- **Visible screen diagonal (inch):** 60 inch
- **Display technology:** Digital Light Processing, DLP HD5
- **Panel resolution:** 1280x720 (720p)
- **Picture enhancement:** 3D Combfilter, Active Control, Color, Contrast Plus, Digital Noise Reduction, Pixel Plus, Tint, AutoPicture (5 modes), Black stretch, Color Transient Improvement, Luminance Transient Improver, Sharpness Adjustment

Supported Display Resolution

- **Video formats**

Resolution	Refresh rate
720p	60Hz

Sound

- **Output power (RMS):** 2 x 10W
- **Sound Enhancement:** Auto Volume Leveller, AutoSound (4 modes), Balance, Treble and Bass Control
- **Sound System:** Virtual Dolby Surround, Stereo

Convenience

- **Ease of Installation:** Autostore
- **Ease of Use:** Channel list
- **Remote control type:** RCLU026
- **Remote Control:** TV
- **Teletext:** Closed Captioning Full Text
- **Picture in Picture:** 1 tuner PIP

- **Screen Format Adjustments:** Super Zoom, 4:3, 4:3 expand, Auto Format, Subtitle Zoom, Widescreen, Zoom 14:9, Zoom 16:9
- **Clock:** Sleep Timer
- **On-Screen Display languages:** French, Spanish, English

Tuner/Reception/Transmission

- **TV system:** NTSC, ATSC
- **Video Playback:** NTSC
- **Aerial Input:** 75 ohm F-type
- **Cable:** Unscrambled Digital Cable -QAM

Connectivity

- **AV 1:** HDMI, CVBS in, Component Video in
- **AV 2:** Component Video in, CVBS in
- **AV 3:** S-Video Y/C, CVBS in
- **Front / Side connections:** S-video in, CVBS in, Headphone out
- **Output rear:** Audio L/R out
- **Audio Output - Digital:** AC3 over S/PDIF (Optical)

Power

- **Standby power consumption:** < 1 W
- **Mains power:** AC 108 - 132 V, 60 Hz

Dimensions

- **Box dimensions in inch (W x H x D):** 60.83 x 41.22 x 25 inch
- **Weight incl. Packaging (lb):** 110.23
- **Set dimensions in inch (W x H x D):** 54.53 x 36.38 x 18.7 inch
- **Product weight (lb):** 81.57

Product highlights

Pixel Plus

This set uses the power of the Pixel Plus processor to increase the number of lines and the number of pixels. The result is razor sharp pictures with incredible detail and dept, every time from any source.

HDTV

HDTV delivers exceptional picture quality and real movie-viewing experience that makes television more dynamic, truer than anything you've seen before. It is the latest and best television signal available. It features picture quality more than twice that of traditional analog broadcasts. In order to effectively maximize the HDTV signal, a television must incorporate advanced signal input connectivity and circuitry design. To use HDTV the TV must be connected via its Component Video, DVI or HDMI inputs to a DTV set-top box and set to operate in the DTV mode.

3D Combfilter

The 3D comb filter separates brightness and color signals better in 3D domain to eliminate cross-color, cross-luminance and dot-crawl distortion - all of which detract from your viewing pleasure. The 3D digital comb filter performs field-by-field comparisons of the television image to accurately separate the color from the black-and-white information and remove both horizontally and vertically hanging dots, as well as dot crawl. The result is a razor sharp image.

Dolby Digital

Because Dolby Digital and DTS, the world's leading digital multi-channel audio standards, make use of the way the human ear naturally processes sound, you experience superb quality surround sound audio with realistic spatial cues.

Picture In Picture (PIP)

Provides the ability to watch simultaneously two different sources, either two video sources or a combination with datagraphics

HDMI input

HDMI makes an uncompressed digital RGB connection from the source to the screen. By eliminating conversion to an analog signal, it delivers an unblemished image. The non-degraded signal reduces flicker and leads to a clearer picture. HDMI intelligently communicates the highest output resolution with the source device. The HDMI input is fully backward compatible with DVI sources but includes digital audio. HDMI uses HDCP copy protection.

Component Video Input (YPbPr)

Component Video is the highest quality interconnection standard for analog video. It is sharper than S-video and composite video. Philips DVD recorders can record directly from component video (such as YPbPr) sources including satellite receivers
