ADVANTAGE TOSHIBA

TALEN™ DLP™ Light Engine with DEEP Picture™ (Digitally Enhanced Engine Performance).

ATSC/QAM Tuners enable the set to receive digital cable-in-the-clear signals, as well as digital terrestrial broadcasts.

CableCARD™ allows for the reception of all applicable digital cable channels without the need of a cable box. This card is supplied by the local Cable MSO.

PixelPure AT™ (Adaptive Technology) includes Motion Adaptive De-Interlacing, Adaptive MPEG Processing, Adaptive Contrast Enhancement, and Adaptive Color Enhancement, all critical elements to deliver the consistently high quality picture expected from a Toshiba Television.

OmniViewer™ Memory Card Slots accommodate 5 different types of memory cards (SD, MM, MS, CF, SM) and includes a JPEG Viewer program that allows the TV to display pictures from most digital cameras.
