

# 60" 16:9 LCD HDTV Monitor Projection Television (D60WLCD)

- ▶ **Compact Size and Weight** Zenith's new D60WLCD weighs only 132 pounds, and is no deeper than most 19" televisions, yet delivers a breathtaking 60 diagonal inch high definition picture. (Set-top box required for high definition reception.)
- ▶ **9 Element Lens System** Precision center-to-corner focus and true-to-life images.
- ▶ **LCD Panel Advancements** LCD panels are unaffected from phosphor burn-in, which can result when an image remains static on a display for an extended amount of time.
- ▶ **Cost Effective** Convergence errors can be costly with a conventional projection television, requiring a service technician to come to your home and realign the projection picture tubes. LCD projection televisions don't require alignment, so you can eliminate costly repairs.
- ▶ **3:2 Pulldown Detection** Movies that are shot on film operate at a frame rate of 24fps (frames per second), compared to video which operates at 30fps. New 3:2 pulldown detects and syncs film to video for smooth theater-like pictures at home.

# 60" 16:9 LCD HDTV Monitor Projection Television (D60WLCD)

## JACK PANEL
