

NJVISION® highdefinitionliving

32" Deep Black LCD HDTV Monitor

The NuVision 32-inch LCD is big enough for the whole family to enjoy, but still intimate enough for the master suite. Its sleek simple design compliments without overpowering while the superb picture quality makes a statement to all who see it. With a mounting depth just over four inches, it's a perfect fit that looks great where ever you put it in your home.

Sleek Design

How a product fits your lifestyle is important and the NuVision goal is to create a modern design that fits your home. The thin profile lets you place it easily in any room on its aluminum stand or custom mounted on a wall or in a cabinet. The clean unobtrusive gloss front bezel is complimented by the velvet touch, rubberized paint used on the cabinet back and the body of the remote control. Its sleek design looks great even when it's turned off.

NiDO Image Processing

NuVision Intelligent Digital Optimization is a comprehensive image processing system that creates a film-like home theater experience from any video source. A NiDO optimized picture ensures crisp, clean images and natural smooth motion that is virtually free from artifacts.

Functionality

A NuVision monitor is more than just a TV. It's also a computer monitor, a security screen and an entertainment center. You can watch TV and a baby monitor on the same screen. You can plug in your laptop for the biggest spreadsheet or video game you've ever seen. The addition of HDMI copy protected digital video input capability means your NuVision set is compatible with the latest HD video components.

Deep Black LCD

NuVision Deep Black LCD technology produces incredible contrast and brightness combined with an excellent ability to produce subtle shades of grey which result in an accurate, realistic looking picture in day or night conditions. Scenes hold black levels while maintaining vibrant, accurate colors. Ultra fast response times means that fast motion scenes look smooth and natural.

NuVision Remote

The NuVision Remote's body is carefully sculpted and is painted with a velvet touch rubberized paint that's easy to hold on to. The ergonomic design allows for simple operation with discrete buttons for input and aspect ratio selection. This allows ease of use without the need to access on screen menus to change inputs or perform key TV functions.

NuVision Warranty and Customer Support

This NuVision TV is backed by a 2 year warranty which covers parts, labor and the LCD. To ensure consumers receive the best support with the best home set-up and installation options, NuVision products are sold and warranted only through its network of NuVision authorized specialty retailers.
