Regulatory Information

FCC Compliance Statement[1]

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Additional Information

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

*   Reorient or relocate the receiving antenna
*   Increase the separation between the equipment and receiver
*   Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
*   Consult the dealer or an experienced technician for help

Warning: The Federal Communications Commission warns that changes or modifications of the equipment not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

DOC Compliance Notice[2]

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the Radio Interference Regulations of the Canadian Department of Communications.This device complies with Canada ICES-003 Class B.

---

1. applies only to products purchased in the United States of America
2. applies only to products purchased in Canada

Description of Warning Symbols

| ⚡ | **CAUTION**
RISK OF ELECTRIC SHOCK
DO NOT OPEN | ! |
WARNING	**CAUTION**
⚠	⚡
This symbol is used to alert users to pay attention to important descriptions regarding usage, maintenance (repair), and additional important information related to this TV.	This symbol is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

Safety Notices

⚠ **Installation Safety Notes**

Location

Avoid allowing the TV to get prolonged exposure to sunlight or other strong sources of heat. Leave sufficient distance between the TV and the wall to provide enough space for the emission of heat.

⚠ # WARNING

To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases, shall be placed on the apparatus.

Notes:

- **The LCD TV is for entertainment use only and visual display tasks are excluded.**
- **This device uses a VGA connector to connect to a PC. To reduce the influence of main frequency on the source signal, use a VGA monitor cable with ferrite shield.**

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

HANNspree **5**

Important Safety Instructions

1.	Read these instructions.
2.	Keep these instructions.
3.	Heed all warnings.
4.	Follow all instructions.
5.	Do not use this apparatus near water.
6.	Clean only with dry cloth.
7.	Do not block any ventilation openings. Install in accordance with manufacturer's instructions.
8.	Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9.	Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet. **NOTE: Applies to US only.**
10.	Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11.	Only use attachments/accessories specified by the manufacturer.
12.	Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

13.	Unplug this apparatus during lightning storms or when unused for long periods of time.
14.	Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15.	WARNING: To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.
16.	The mains plug is used as the disconnect device and shall remain readily operable.
17.	The apparatus should be used in moderate climate.
18.	The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

For detailed definitions of technology terms, please visit our website at
www.hannspree.com/us (under the services section).

HANNspree **7**

Personal safety

1. To avoid overloading the power supply, never plug too many electrical devices into an outlet, power strip, or extension cable.

2. Dangerous high-voltage electric power components are located inside the TV. To avoid electric shock, do not disassemble the casing.

3. Do not place or drop metals, small objects, or flammable materials into the vent of the TV.

4. If the TV is dropped, falls down, or is otherwise damaged, unplug the power cord immediately and contact an authorized service technician.

5. If any fluid is sprayed or dropped into the TV, contact an authorized service technician.

6. The screen of the TV is made of glass. Avoid hitting or scraping it. If the screen is broken, do not touch the broken glass.

7. Do not allow children to use the TV unattended.

8. Be careful when disconnecting the power plug. Hold the plug. Do not attempt to disconnect the plug by pulling on the power cord.

Installation

1. Do not place the TV in locations where there is excessive steam or dust.

2. Avoid blocking the TV's vents, do not place the TV on a bed, sofa, carpet, or in a sealed cabinet.

3. Install the outdoor antenna away from power transmission lines to avoid possible danger.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

Preface

Thank you for purchasing a Hannspree Liquid Crystal Display Television (LCD TV). Your new TV will allow you to enjoy superior audio and video while enriching your lifestyle with advanced technology.

Please carefully read this manual in its entirety before setting up, using or operating your TV. To ensure the safe and correct installation and operations of the TV, it is important that the safety and operation instructions in this manual are followed.

This instruction manual is designed to assist you in setting up and using the TV. The information in this manual has been carefully checked for accuracy; however, no guarantee is given to the correctness of the contents. The information in this manual is subject to change without notice.

To the extent allowed by applicable law, Hannspree, Inc. ("Hannspree") shall not be liable for direct, indirect, special, exemplary, incidental or consequential damages arising from any defect or omission in this manual, even if advised of the possibility of such damages in advance.

Warranty and Service

For complete warranty service information, please refer to the "Warranty card" enclosed with your TV.

As an ENERGY STAR$^{®}$ Partner, Hannspree has determined that this product meets the ENERGY STAR$^{®}$ guidelines for energy efficiency.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

Recycling Information

We care very much about our environment protection strategy and firmly believe that it helps us have healthier earth via appropriate treatment and recycling of industrial technology devices at the end-of-life.

These devices contain recyclable materials, which can be re-decomposed and re-integrated into brand-new marvels. On the contrary, other material can be classified to hazardous and poisoned substance.

We strongly encourage you to visit our website or call to find out recycling information and services available in your area.

1 Getting Started

1.1 Package Contents

Make sure the following components are included in the box. Please contact Hannspree Customer Service immediately if anything is missing or damaged.

- TV
- Remote control and batteries
- User's Manual
- Quick Start Guide
- Warranty card
- HDMI cable

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

1.2   Introducing the TV

You can watch NTSC/ATSC broadcast, cable, or digital television channels, and easily connect a VCR, STB (set-top box), or DVD player to the standard AV (CVBS/Composite), Component (YPbPr), and HDMI input ports (location of these ports depends on model). You can also use the TV as a monitor for your PC by connecting it through the VGA or DVI port.

Convenient control buttons located on the TV and a handy remote control let you change channels, adjust the volume, and change display settings through an easy-to-use on-screen display menu system. The built-in stereo speakers provide full rich sound and a convenient audio output port lets you connect to an external audio system or earphones.

1.2.1   Features

- Built-in TV tuner
- Audio/ Video support:
  - PC audio input
  - Component (YP_bP_r) input
  - AV (Composite) input
  - VGA input
  - HDMI input
  - SPDIF digital audio output (Optical)
  - R/L audio inputs for AV and Component (YPbPr)
- On-Screen Display (OSD) menu system
- Built-in stereo speakers
- Digital Noise reduction
- 3D comb filter
- De-interlace Image
- 3:2/ 2:2 Pull down
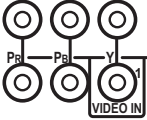

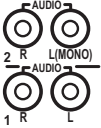

Note:
The supporting devices mentioned in this manual may vary on different models.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

Fast-forward	▶▶	Press to go forward.
Next	▶▶❙	Press to skip to the next section.

Note:
- For best results, use the remote control within a proper distance from the front of the TV. Do not exceed an angle of 30 degrees when pointing at TV.
- The operational distance may be shortened when the signal sensor is directly exposed to strong light.
- Aim the transmitter on the remote control at the signal sensor and ensure that there are no obstacles between them.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

1.6   Inserting the Remote Control Batteries

1   Open the battery compartment cover at the back of the remote control (A).
2   Insert the batteries paying attention to the polarity markings inside the battery compartment (B).
3   Close the battery compartment cover (C).
⚠ CAUTION

- If the remote control is not used for a long period, remove the batteries and store them properly.

- Handle damaged or leaking batteries carefully, and wash hands with soap if they come in contact with leaked chemical fluids.

- If your remote control has two batteries, do not mix new and old batteries, or the life of the new batteries will be shortened. Chemical fluids may leak from the old batteries.

- Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the equipment manufacturer. Discard used batteries according to manufacturer's instructions.

- Refer to your local recycling or waste disposal rules and contact a local waste disposal vendor to dispose of used batteries.

- The remote control cover may have a magnet in it, so do not place magnetic sensitive items such as watches, credit cards, or flash media close to the cover.

- Do not use force when pulling the remote control cover open; you may damage the hinge.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

2 Setting up your TV

2.1 Basic Connections

2.1.1 Power Connection

1 Connect the power cord to the AC IN input jack on the rear of the TV.

2 Plug the other end of the power cord into a power outlet.

2.1.2 Connecting an Antenna or Cable TV

Connect one end of the VHF/UHF (Antenna) or CATV cable to VHF/UHF jack on the rear of the TV.
Note:
If you cannot receive channels after connecting to an antenna or cable TV line, try scanning for channels.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

HANNSpree **21**

2.2   Connecting External Devices

Connect external devices such as VCRs, set-top box, DVD players, video game consoles, or a PC to the TV using the appropriate ports on the rear of the TV.

2.2.1   Connecting to AV Devices

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).
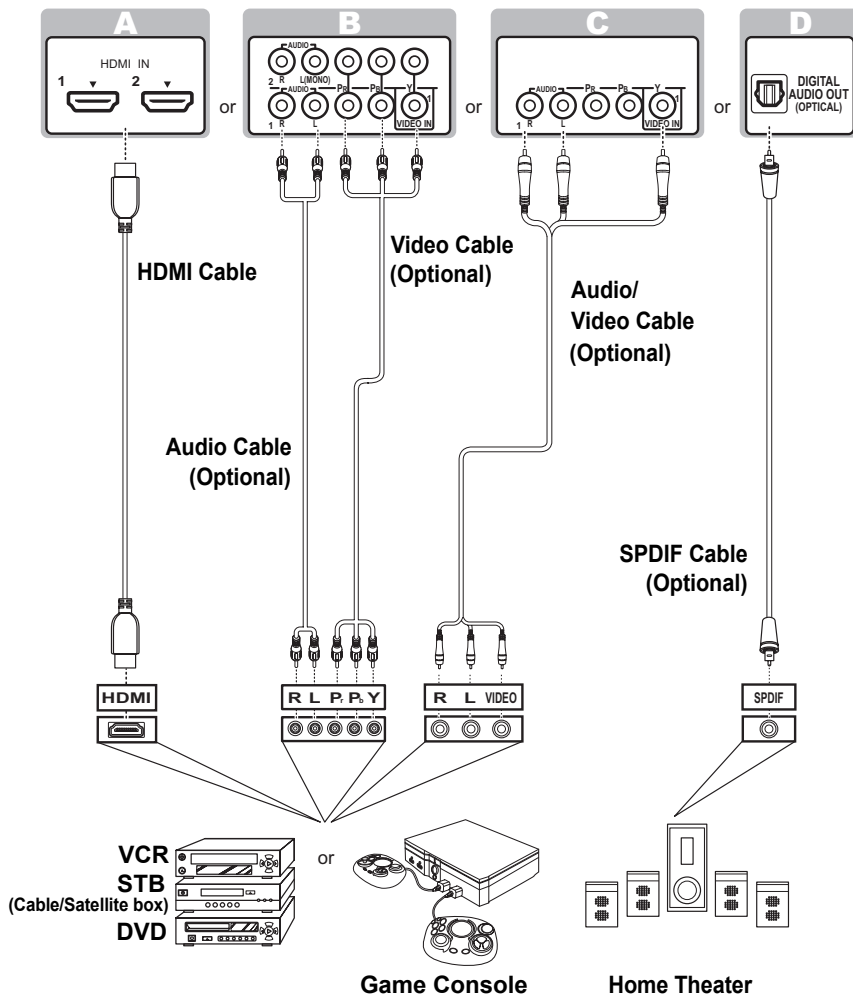

2.2.2   Connecting a VCR/ Set-top box/ DVD Player Using Video Inputs

Connect the TV to a VCR/set-top box/ DVD player using the video inputs.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

HANNspree **23**
2.2.3 Connecting a PC using VGA

Connect the TV to your PC to use it as the monitor using the VGA port as shown.

1 Connect the VGA port of the TV to the VGA output of the PC.
2 Connect the PC AUDIO IN port of your TV to the line out port of the PC to listen to audio from the PC.
2.2.4 Connecting a PC using DVI

Connect the TV to your PC to use it as the monitor using the DVI port as shown.

1 Connect the HDMI 1 or HDMI 2 port of the TV to the DVI output of the PC.
2 Connect the PC AUDIO IN port of your TV to the line out port of the PC of your TV to listen to audio from the PC.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).
2.2.5   Connecting HDMI

HDMI (High Definition Multimedia Interface) assures that the best video signal is always sent from source to the TV.

Refer to the following illustration to connect an HDMI device to the TV.

HDMI Cable

DVD Player
Note:
When the HDMI cable is connected, connecting the audio cable is not necessary. However, it is necessary to do so if an HDMI to DVI cable is connected.

2.2.6   Connecting SPDIF

The SPDIF output can be used to connect the TV to a sound bar or home theater system that supports Dolby Digital or DTS surround sound.

Refer to the following illustration to connect an SPDIF device to the TV.

Home Theater

SPDIF Cable
2.2.7 Connecting USB

Connect the USB flash drive to the TV using the USB port as shown. The JPEG and MP3 files are supported.

**USB Flash Drive
(Optional)**
Note:
The USB HDD (Hard Disk Drive) is not supported.

2.3 Using the TV

2.3.1 Turning the TV On and Off

1 Press (¹) on the control panel or remote control. The power LED indicator on the TV changes from red to green, indicating that the TV is on.

2 Press (¹) again. The power LED changes from green to red, indicating that the TV is off.

2.3.2 Switching Source Signals

Press **INPUT** on the control panel or remote control to select the incoming source signal to set TV source for channel search. Press **OK** to confirm.

2.3.3 Performing an Automatic Channel Search

Before using the TV to view programs, you need to activate the channel search first.

1 Press **MENU** on the control panel or remote control, then select to enter the TV menu.

2 Select **Tuner Mode** to set the signal source to **Antenna** or **Cable**.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

3 Select **Channel Scan**.

4 Press **OK** on the remote control to run the channel search.

2.3.4 Selecting Channels

- Press **CH▲** on the control panel or $\overset{\blacktriangle}{CH}$ on the remote control to increase the channel number.

- Press **CH▼** on the control panel or $\underset{\blacktriangledown}{CH}$ on the remote control to decrease the channel number.

- Enter the specific channel number by pressing the number buttons on the remote control.

2.3.5 Adjusting the Volume

1 Press **VOL+** on the control panel or $\overset{+}{VOL}$ on the remote control to increase the volume.

2 Press **VOL-** on the control panel or $\underset{-}{VOL}$ on the remote control to decrease the volume.

3 Press **MUTE** to eliminate sounds, and press **MUTE** again or press the volume buttons to restore the original volume.

2.3.6 Editing Channel Table

1 Press **MENU** on the control panel or remote control, then select to enter the TV menu.

2 Select **Channel Skip** and press **OK** to enter the Channel List.

3 Press ∧ / ∨ to select the desired channel.

4 Check/Uncheck the channel with **OK** to hide/show the channel.

5 Press **MENU** to exit.

2.3.7 Viewing Images and Playing Music

1 Insert the USB flash drive into the USB port.

2 Press **MENU** on the remote control, then select to enter the Video menu.

3 Select **Multimedia** and press **OK** to enter the Multimedia screen.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

HANNSpree **27**

4   Press **MENU** on the remote control to select
    Media Type and press **OK**.

    • To view images, select **Photo** and press **OK**.

    • To play music, select **Music** and press **OK**.

    NOTE: Only files matching the selected media
        type are displayed.

5   Use $\wedge$ / $\vee$ / $\langle$ / $\rangle$ to select the desired folder
    (if any) and the desired image/music file.

6   Press **OK** to play the selected music file or start
    off the slideshow with the selected image file.

    • During music playback, press **OK** to pause and
       press again to resume.

    • During slideshow, press **2** to switch the duration.

    • During slideshow, press **3** to switch the effect.

7   Press **RETURN** on the remote control to stop.

8   Press **MENU** on the remote control to exit.

For detailed definitions of technology terms, please visit our website at
www.hannspree.com/us (under the services section).

3 Adjusting On-Screen Display (OSD) Settings

The On-Screen Display (OSD) menu system provides a quick and simple method to adjust the TV settings. The OSD menu can be accessed through the buttons either on the control panel or the remote control.

MAIN MENU:

Displays a list of menu items. The chosen item is marked by a different color than other menu items.

ADJUSTABLE ITEMS:

Displays the settings/ values of the adjustable items.

3.5 Adjusting Setup Settings

1 Press MENU to enter the OSD Main
Menu screen.

2 Press ⋀ / ⋁ on the remote control to
select Setup menu.

3 Press ❭ / **OK** on the remote control to
enter the Setup menu.

OSD Language	English
Screen Mode	Normal
Video/Component1	Auto
DPMS	On
Blue Mute	On
Time Setup	
Caption	
Version Info	
Reset Default	

Setup   OK Enter ◀▶/◆ Select RETURN Exit

4 Press ⋀ / ⋁ on the remote control to select an item.

5 Press ❬ / ❭ on the remote control to enter an item or select an option.

6 Press **RETURN** to return to the Setup menu.

7 Press **MENU** to exit the Setup menu.
The Setup menu can be used to adjust the **OSD Language**, **Screen Mode**,
Video/Component1, **DPMS**, **Blue Mute**, **Time Setup**, **Caption**, **Version Info**, and
Reset Default settings.

- OSD language can be set to **English**, **Español**, or **Français**.
- Screen Mode can be set to **Normal**, **Letterbox**, **Panorama**, **Zoom**, or **Dot by Dot**.
- Video/Component1 can be set to **Auto**, **Video**, or **Component1**.
- DPMS can be set to **On** or **Off**.
- Blue Mute can be set to **On** or **Off**.
- Time Setup can be used to set **Time Zone**, **Time**, **Sleep Timer**, and **Auto Sleep**.
- Caption can be used to set **Analog Closed Caption**, **Digital Closed Caption**, and
  Digital Caption Style.
- Version Info can be used to view **Firmware Version** and **Panel Type**.
- Reset Default can be used to restore the factory defaults.

Note:
The items available on the OSD may vary depending on the input signal source.

3.6 Adjusting Parental Settings

1 Press **MENU** to enter the OSD Main Menu screen.

2 Press ∧ / ∨ on the remote control to select Parental menu.

3 Press 〉 / **OK** on the remote control to enter the Parental menu.

	Channel Block	⫸
	Program Block	⫸
	Input Block	⫸
	Change Password	⫸
	Clean All	⫸

Parental   OK Enter ◀▶/⬍ Select RETURN Back
4 Enter the password to activate the Parental menu (the default is **1234**).

5 Press ∧ / ∨ on the remote control to select an item.

6 Press 〉 / **OK** on the remote control to enter the item.

7 Press **OK** on the remote control to mark an item or press ∧ / ∨ on the remote control to select an option.

8 Press **RETURN** to return to the Parental menu.

9 Press **MENU** to exit the Parental menu.

The Parental menu can be used to adjust **Channel Block**, **Program Block**, **Input Block**, **Change Password**, and **Clean All** settings.

4 Troubleshooting

Situation	Solution
No picture and sound.	• Connect the power cord properly. • Check if the power LED is on or not. • Press ⏻ on the control panel or remote control. • Press INPUT to cycle through connected video sources. • Press channel up or channel down to switch to other TV channels. • Make sure all cables are connected properly.
No picture, or poor picture, sound is OK.	• Check the antenna and cable connections. • Adjust the brightness in the OSD menus.
Picture is not in color.	• Adjust the saturation in the OSD menus.
Picture is OK, no sound.	• Make sure the source device is functioning properly. • Make sure the audio cable is connected securely. • Turn the mute off. • Press volume up on the control panel or remote control.
One of the speakers has no sound.	• Adjust the balance in the OSD Audio menu.
Cannot receive some TV channels using cable TV.	• Try the Channel Scan function in the OSD TV menu.
Want to reset TV settings.	• Use the Reset Default function in the OSD Setup menu.
Cannot operate menus.	• If OSD items are colored in gray, the system is in a state such that those settings are not available.
Screen image turns over.	• Make sure the video signal cable is connected properly.
Snow appears on the screen.	• Adjust the location of the antenna, placing it far from roads or sources of interference. • Check the antenna and the video signal line connections.
Blurred or overlapped images.	• Adjust the sharpness setting. • Choose programs with high quality signals. • Adjust the direction of the antenna or change the video signal cable.
Remote control doesn't work.	• Make sure the battery is inserted correctly. • Replace the battery with a new one. • Make sure the TV power cord is plugged in securely. • Make sure the path between the remote control and the sensor is clear. • Try operating the remote control at a closer distance to the TV.

6

Appendix: Remote Control Guide

6.1 Introduction

The electronic equipment type switch buttons are used for switching the current electronic equipment type on the remote control.

The remote control includes 4 electronic equipment types: DVD, AUDIO, CABLE and TV.

The remote control keypad matrix includes 4 electronic equipment type switch buttons (DVD, AUDIO, CABLE and TV). If switching the current electronic equipment is desired, just press the button of the electronic equipment type you wish to switch to, e.g., press the TV button for TV; the corresponding indicator light then comes on for 2 seconds then it goes off after, and now the current electronic equipment mode has been switched to TV.

6.1.2 Setting Program Codes

Electronic equipment code setting mode is used for setting electronic equipment codes for various types of electronic equipment. Electronic equipment codes are 4 digits. Electronic equipment codes can be looked up in the electronic equipment code list of the appendix.

Electronic equipment code setting mode has the following operating procedures:

1. Select a 4-digit code from the list (start from the first code if more than one).

2. Select the desired corresponding mode of electronic equipment type; for example, DVD players.

3. Press DVD button. The indicator light will come on for 2 seconds then it goes off; after 3 seconds, the indicator light will come on again, showing that the setting mode has been entered.

4. Hold the electronic equipment button, while pressing digit keys corresponding to the electronic equipment code in sequence. The indicator light will flash once each time when a digit was inputted, and if the indicator light does not come on again after going off, the input code is valid; if the indicator light comes on again after going off for 2 seconds, the code is invalid, and users will be prompted to input other electronic equipment codes.

5. During the setting process, releasing the electronic equipment button exits the setting mode immediately without changing the status prior to setting.

6. During the setting process, only digit keys '0' through '9' are valid inputs, while other buttons are deemed invalid and do not affect the code setting. For example, inputting "02" then pressing RETURN does affect the "02" already input.

6.1.3   Searching Codes

If the desired electronic equipment code for setting can not be found on the list in the appendix, try to use the code-searching function with operating procedures as follows:

1. Press the corresponding electronic equipment button.The indicator light will come on for 2 seconds then it goes off; after 3 seconds, the indicator light will come on again, showing that the setting mode has been entered.

2. Hold the electronic equipment button while pressing POWER, then input mode codes 9-9-9 in sequence. If the indicator light does not come on again after going off, the code setting is valid; otherwise the indicator light comes on again after going off for 6 seconds, prompting user to re-enter mode codes.

3. If setting is successful, the electronic equipment code-searching state is entered upon releasing the electronic equipment button. The POWER signal of all manufacturers' codes under the current electronic equipment mode is then transmitted automatically every 5 seconds.

4. During search, the indicator light will flash when the POWER signal of each electronic equipment is transmitted. When one cycle of code-searching is complete, the indicator light will come on for 6 seconds before going off, exiting search mode automatically.

5. Pressing CH+/CH- during search transmits the next/previous electronic equipment POWER signal without waiting for 5 seconds, and resets the timer to trigger another 5 seconds interval.

6. Pressing POWER during search exits search mode without saving the new electronic equipment code; pressing OK during search saves the most recently searched electronic equipment code and then exits search mode.

7. Buttons other than POWER, OK, and CH+/CH- are not functional during search.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

HANNSpree **39**

6.1.4   Setting Volume Lock

Operating procedures are as follows:

1. Press the corresponding electronic equipment button. The indicator light will come on for 2 seconds then it goes off; after 3 seconds, the indicator light will come on again, showing that the setting mode has been entered.

2. While holding the electronic equipment button, press VOL+ twice consecutively to assign volume lock to that electronic equipment (meaning the volume buttons will only transmit code values to the assigned electronic equipment even under other electronic equipment modes). The indicator light then goes off and setting mode is exited.

3. While holding the electronic equipment button, press VOL- twice consecutively to cancel volume lock under current mode (for example, if volume lock was set under TV mode and you wish to transmit code values under current DVD mode, just perform this unlock operation, while those electronic equipment modes not operated still have volume locked up). The indicator light then goes off and setting mode is exited.

4. During the setting process, releasing the electronic equipment button exits the setting mode immediately without changing the status prior to setting.

5. Buttons other than VOL+/VOL- are not functional during search. Volume buttons include VOL+, VOL- and MUTE.

6.1.5   Setting Channel Lock

Operating procedures are as follows:

1. Press the corresponding electronic equipment button. The indicator light will come on for 2 seconds then it goes off; after 3 seconds, the indicator light will come on again, showing that the setting mode has been entered.

2. While holding the electronic equipment button, press CH+ twice consecutively to assign channel lock to that electronic equipment (meaning the channel buttons will only transmit code values to the assigned electronic equipment even under other electronic equipment modes). The indicator light then goes off and setting mode is exited.

3. While holding the electronic equipment button, press CH- twice consecutively to cancel channel lock under current mode (for example, if channel lock was set under TV mode and you wish to transmit code values under current CABLE mode, just

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

perform this unlock operation, while those electronic equipment modes not so operated still have channel locked up). The indicator light then goes off and setting mode is exited.

4. During the setting process, releasing the electronic equipment button exits the setting mode immediately without changing the status prior to setting.

5. Buttons other than CH+/CH- are not functional during search. Channel buttons include CH+ and CH-.

6.1.6   Factory Setting Mode

Factory setting operation procedures are as follows:

1. Press the corresponding electronic equipment button. The indicator light will come on for 2 seconds then it goes off; after 3 seconds, the indicator light will come on again, showing that the setting mode has been entered.

2. While holding the electronic equipment button, first press < (left arrow), then press OK. The indicator then goes off and setting mode is exited, showing factory setting has been restored.

3. During the setting process, releasing the electronic equipment button exits the setting mode immediately without changing the status prior to setting.

4. Pressing any of the electronic equipment buttons to enter factory setting operation mode.

5. The default current electronic equipment is TV upon first power-on.

Electronic equipment	Code	Note
TV	1001	Provided by manufacturer
CABLE	--	Transmit TV code
AUDIO	--	Transmit TV code
DVD	--	Transmit TV code

6. Default volume lock setting:

Electronic equipment	VOL+, VOL- and Mute	Note
TV	Transmit TV code	Provided by manufacturer
CABLE	Transmit CABLE code	Unlocked
AUDIO	Transmit AUDIO code	Unlocked
DVD	Transmit DVD code	Unlocked

7. Default channel lock setting:

Electronic equipment	CH+ and CH-	Note
TV	Transmit TV code	Provided by manufacturer
CABLE	Transmit CABLE code	Unlocked
AUDIO	Transmit AUDIO code	Unlocked
DVD	Transmit DVD code	Unlocked

Note:
   Each re-powering restores factory setting, and all electronic equipment modes transmit TV-mode infrared (IR) signal until being set up through code setting. For example, setting the electronic equipment code of CABLE as '0001' stops transmitting TV code, whereas AUDIO and DVD continue to transmit TV code.

6.1.7   Description

There is no multi-function code setting operation under TV mode but a fixed code for the TV manufacturer. Therefore, code setting and code-searching functions are disabled under this mode; other functions such as volume lock, channel lock and code display are operable.

6.2   Other Descriptions

6.2.1   Double Clicking

At any time, only when a single button is pressed, the corresponding code is just output. Two or more buttons simultaneously pressed do not output any code.

6.2.2   Buttons Information

Except TV equipment, all the buttons on remote controls corresponding to other electronic equipments (AUDIO, CABLE, and DVD) are not necessarily functional, but most of those remote controls only include power control, channel control, volume control, etc.

6.2.3   Power-out Protection Capability

During battery replacement, all settings are only maintained by external capacitors. Data therefore may be lost after power-out, and factory setting will be restored.

For detailed definitions of technology terms, please visit our website at www.hannspree.com/us (under the services section).

## 7   Setting the TV on the Wall

Disassembling the stand base:

1   Disconnect all the cables and cords from the TV to prevent breakage.

2   Carefully place the TV face down on a soft and flat surface (blanket, foam, cloth, etc) to prevent any damage to the TV.

3   Remove the three (3) screws so that the stand base can be removed.

4   Gently remove the stand base.
(For reference only)

Wall mounting the TV:

1   Purchase a VESA compatible wall bracket: VESA 200 X 200, 4 holes, M6, 12 mm, 20kg.

2   Locate your ideal TV position on the wall.

3   Fix the wall bracket firmly on the wall.

4   Secure the TV to the bracket using the 4 mount holes on the back and center of the TV.
Note:
- Please read the instructions of your specific wall bracket to properly wall mount the TV.
- The pitch of the mounting holes is 200mm horizontally and 200mm vertically.
- The screws type required is metric: M6, 12mm length.
- The 32" TV stand base can be screwed on a table or a hard surface using the hole on the back of the stand base.

*Installing the LCD TV requires special skill that should only be performed by qualified service personnel. Customers should not attempt to do the work themselves. Hannspree bears no responsibility for improper mounting or mounting that results in accident or injury. You can ask a qualified service personnel about using an optional bracket to mount the TV to the wall.

HANNSpree **51**

8

Using the Cable Organizer

1 Insert the cable clamp into the square hold on the rear of the TV.

2 Route the cables through the cable clamp.
