

CLIMATE PORTFOLIO™

WP-42HD

LUXURY OUTDOOR VIDEO DISPLAY

RUNCO

THE WORLD'S FINEST
HOME THEATER PRODUCTS®

The Climate Portfolio™ WP-42HD offers legendary Runco® product quality and attention to detail housed inside a slim, yet rugged, weatherproof cabinet. Best of all, this display is finished with the same elegant look and style that distinguishes all Runco flat panels.

Rain or shine, the WP-42HD will enhance your luxury outdoor lifestyle. This 42-inch high-definition widescreen flat-panel monitor utilizes advanced LCD technology in an enclosure designed to withstand the elements. Featuring 1366 x 768 native resolution and light-rejection glass, the WP-42HD's image quality is pristine and always impressive.

The WP-42HD enclosure has been engineered for maximum durability. We have gone to great lengths to ensure protection from adverse environmental conditions including temperature, exposure to moisture, dust, oils, and even intermittent direct water spray.

Engineered into the monitor is an internal setting that allows operation in colder temperatures (-4°F in Winter Mode) so you can enjoy viewing year round. The aluminum cabinet is sealed to ensure protection from the elements and features a specially-designed internal ventilation system to provide adequate cooling when needed. As a result, the Runco WP-42HD surpasses IP56 weatherproof standards, which accommodates leaving it outdoors 365 days a year, without worry.

Installation options are limited only by the imagination. Patios, barbeques, gazebos, pools, hot tubs, gardens, tennis courts, putting greens – literally anywhere you want amazing video in a sleek flat-panel design.

The WP-42HD is a Runco, offering all the user-friendly features you've come to expect from the brand that prides itself in providing the world's finest home theater products. Custom installation capabilities include an RS-232 automation interface with discrete on/off, input selection and aspect ratio control. The WP-42HD also features Runco's exclusive Vivix® video processing for outstanding imagery, artifact-free scaling and superb reproduction of both native film and native video formats.

A wide variety of inputs include a digital DVI with HDCP, as well as a multi-media RGB/computer input for gaming, internet surfing and other computer activities. The Runco WP-42HD has an exceptionally wide viewing angle of 178 degrees to make enjoyment possible for a large number of viewers with widely dispersed seating positions.

Runco invites you to enjoy the world of true luxury outdoor living with the WP-42HD.

The WP-42HD includes a special weatherproof wiring harness designed to withstand weather extremes.

Specifications	WP-42HD
