#### **FULL HD 1080P RESOLUTION**

Displays HDTV programs in full 1920 x 1080p resolution for a more detailed picture.

#### **TRUMOTION 120HZ**

Advance 120Hz panel provides clear, smooth images, even during fast action scenes creating a stable structure for a crisper picture.

#### **INTELLIGENT SENSOR**

Unlike other sensors which can only sense brightness of ambient light, LG's "Intelligent Sensor" uses 4,096 sensing steps to evaluate its surroundings. Using a sophisticated algorithm, the LG processes picture quality elements including brightness, contrast, color, sharpness and white balance. The result is a picture optimized for it's surroundings, more pleasing to watch and which can also save up to 50% in power consumption.

#### **24P REAL CINEMA**

Hi-def movies run at exactly 24 frames per second speed that they were originally filmed in, making your home-cinema experience one step closer to a "Real Cinema" experience.

#### **CLEAR VOICE TECHNOLOGY**

Automatically enhances and amplifies the sound of the human voice frequency range to provide high-quality dialogue when background noise swells.
