HL-S6165W

61" Widescreen DLP® HDTV with 720p Resolution

Featuring a "floating screen" design, Samsung's 61" Widescreen DLP® TV delivers an astounding HDTV experience. Samsung, the recognized leader in DLP technology, created the breakthrough Cinema Smooth™ light engine that produces razor-sharp pictures in 720p. The natural, vivid colors of Samsung's HL-S6165W are achieved through our advanced Brilliant Color™ technology with a faster color wheel. A contrast ratio of up to 2500:1 captures blacker blacks and crisper whites. And the ultra-fast DLP chip results in the fastest video performance of any HDTV. Best yet, Samsung's superior technology ensures no image burn-in for a reliable, long-lasting picture.

TV/Video

- DLP® TV by Samsung
- "Floating screen" compact, lightweight design fits where others won't™
- Built-in analog/digital tuner (NTSC/ATSC)
- Samsung Cinema Smooth™ 720p light engine
 - Single panel digital micro-mirror device (DMD) design for a crystal clear picture without any possibility of convergence errors
 - Up to 2500:1 contrast ratio with outstanding colors and deep black levels
 - Whisper-quiet operation
- Brilliant Color[™] provides brightness increase in non-primary colors and boosts overall color intensity
- 1280 x 720 digital format converter for all inputs
- Samsung DNIe™ video enhancement
- Samsung's Cinema Smooth™ film-mode 3:2 pull down
- No burn-in or uneven screen aging
- Game mode

Audic

Audio wattage – 10W x 2 output

Connections

- 2 HDMI inputs (High Definition Multimedia Interface) accepts 1080p format
- 2-component video inputs (480i/480p/720p/1080i/1080p)
- 3 (2 rear/1 side) A/V composite inputs and
 3 (2 rear/1 side) S-video inputs
- PC (RGB) input

HDMI

Integrated HDTV Tuner

with the addition of a suitable UHF/VHF antenna delivers the world of free off-air DTV and HDTV local broadcast channels.

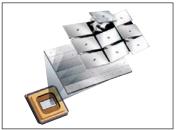

Cinema Smooth™ Light Engine

Samsung is the worldwide leader in creating light engines that harness DLP HDTV technology from Texas Instruments. Samsung's Cinema Smooth light engine brings together the right optics, electronic circuitry and replaceable light source to create a brilliant picture that's more lifelike and much closer to film. Now in its fifth ifth year of evolution, Samsung's Cinema Smooth light engine delivers crisp, 720p High Definition resolution with high contrast and brightness, defined edges and sharp detail.

Cinema Smooth 720p Light Engine

Samsung's Cinema Smooth 720p light engine is the culmination of years of industry-leading research and development. It releases the maximum power of the new generation of DMD microdisplays for the most film-like picture. It creates an image with no visible pixel structure and accurate shading and better low-light detail.

Next Generation DLP Chips from Texas Instruments

Samsung employs a Texas Instruments DLP chip that is comprised of millions of microscopic mirrors. The DLP chip is faster than any HDTV technology, with the mirrors switching on & off 15,000 times a second to deliver a razor-sharp picture for fast moving images When combined with Samsung's new Cinema Smooth light engine, the result is a crisp, bright picture with deep, rich colors that's closer to film.

Faster Color Wheel

Samsung's 2.2" color wheel spins at 14,400 rpm for smooth fast-motion video, and has five color segments for more accurate colors. Comprised of the 3 primary colors, Red, Green and Blue plus Cyan and Magenta. It achieves film-like transitions and eliminates the pixel breakup found in slower color wheel designs and slower-switching LCD microdisplays. The Cinema Smooth $^{\text{TM}}$ light engine uses a whisper quiet air bearing design.

Samsung's DNIe[™] - Digital Natural Image Engine

Samsung's exclusive Digital Natural Image engine makes the sharpest and clearest images possible, regardless of the profile of input signals. Five image processors and a six-times density enhancer ensure the best picture from any source. Now in its fourth generation, DNIe guarantees the truest colors and highest contrast, while virtually eliminating digital artifacts.

My Color Control

You can get the pink tones, the green of the grass and the blue of the sky just the way you like, without affecting the other colors on the screen. The three major colors can be adjusted to perfectly fit your taste. Self expression meets display perfection.

HL-S6165W

Cinema Mode

Samsung's Cinema Mode lets you see colors the way the director intended, by matching them more closely to production standards. This creates more accurate colors and natural skin tones when viewing Hollywood movies on your TV - the perfect setting when enjoying movies with the lights off.

> Cinema Smooth™ Film Mode 3:2

Powered by Samsung's Cinema Smooth technology, 3:2 Pull Down corrects for the artificial frames created

when films are converted to DVDs.

The result is a clearer image without

Picture Format Size

Adjustment

Zoom 2

V-Chip¹

enables parental control for channel and program blocking of TV programs that incorporate the rating code signal.

Clock with On/Off Timer

Closed Caption displays dialog that can be read along with encoded broadcast TV programs and pre-recorded videos.

Non Volatile Memory

preserves audio, video and menu settings during power outages.

Auto Volume Leveler

keeps audio volume consistent during channel changing to minimize static sound bursts.

Discrete IR Codes

This set is equipped with discrete IR codes for use with an optional macro/programmable remote (see owners manual for details).

Universal Remote Control

permits control of the TV. DVD. VCR and a Tuner/Receiver.

HDMI (High-Definition Multimedia Interface)

addresses both pure digital audio and video performance and simplifies connections from the new generation set-top boxes and DVD players by reducing cable connections to one cable and plug.

Previous Channel

returns to the previously viewed channel at the push of a button.

Game Mode

with on-screen display.

enhances dark areas, sharpens the picture, speeds up the image processing response and enhances the sounds of your games. Picture and sound quality optimized for the special needs of gaming systems at the touch of a button.

Color Temperature Adjustments
