# Built for business

Not just LCD panels. These are productivity panels.

We've designed-in more than 20 years of experience, innovation and leadership in digital projectors to create a line of LCD panels designed for collaboration, presentations, demonstrations, web meetings and video conferencing. InFocus flat panel displays provide the benefits and performance you need in the meeting room and can't find in consumer TVs.

InFocus large format LCD panels deliver gorgeous images and video – at prices that fit your lean budget. They connect easily and automatically with the computer and video sources you use in your business.

### Everything you need in a business-class display

Available in three sizes, InFocus productivity panels deliver full 1080p native resolution and handle computer resolutions up to WUXGA (1920 × 1200) as well as standard and High Definition video signals.

RS232 port allows InFocus productivity panels to integrate easily with Crestron and AMX digital media and room control systems that handle an array of AV sources, computer inputs and lighting controls.

Amplified speakers provide full audio-video support.

The SplitScreen™ feature allows you to display two full-size images or video simultaneously. Focus on the critical content. Easily switch, shrink and enlarge side by side images for emphasis.

INF5501 Connectivity Options

**Connectivity options**

| VGA (HD15) | HDMI | RS232 |
|---|---|---|
| Component Video | Composite Video | S-Video |
| 3.5 mm audio in | Audio out | Monitor out |

### Your investment is protected:
