The CMP420V1 and V2 serve a broad range of commercial uses—from single-point signage and networked multi-site retail display systems to custom AV applications. The display creates a sharp, detailed image with any type of input content. A high contrast, anti-reflective glass shield improves information visibility in locations where ambient light could create distracting reflections.

The RS-232C interface is compatible with leading control systems and makes integrating the CMP420V1 or V2 a simple operation.

The modern and sleek black or silver design creates a unique look with stylistic appeal.

As part of the family of Hitachi Professional Products, the On-Screen Display and Menu Navigation remains the same for the CMP420V1 and CMP420V2 as other HD panels, making switching between models less cumbersome. Unique menu options such as instant Color Decoder access makes customization quick and easy.
