3D Enabled

42" LCD Display

True 3D Effect & "POP" Effect

By using a 9-view lens as opposed to a Pseudo 3D effect, our displays show life-like images that reach out and touch you (around 8" - 12" off the screen)

Superior Quality Image with minimum effect on Resolution & Brightness

We utilize Pixel Magnification rather than Pixel Blocking to create the 3D effect

Ability to show 2D & 3D content at the same time with virtually no loss resolution

With specially developed content you have the option to view 2D or 3D images at the same time. Thus, putting more emphasize on the main idea/content you want to present!

90 degree viewing angle

Unlike some of our competitors' products, our display provides clear pictures from various angles up to 45 degrees on both sides from the center. You no longer need to stand directly in front of the display to get the best effect!

Licensed Technology and Software Development Kits (SDK)

Magnetic's playback software development kits (SDK) make it easier for the customer to develop their own content!

Quality Product at Competitive Prices

We are able to offer our customers a superior product at half the cost of our competitors!

Superior Service with Turn-Key Solutions for both Hardware & Software

We provide you hardware and easy access to create your own content software!

Stylish & Space Saver with Thin-Bazel Design

No more bulky displays! With our newly designed thin bazel, our sleek unit provides the ultimate fit into any casino or dining room hall.

Custom fit for any opening and/or cabinet

For easy installation and maintenance, we can accommodate any custom design you need!
