### TECHNOLOGY & BENEFITS

#### **VIDEO**

New TALEN™ 5 720p DLP® Engine - Incorporates 5th generation DLP technology from Texas Instruments for our best 720p picture yet.

Radiance 150<sup>TM</sup> Hi-Bright Lamp with Quick Restart<sup>TM</sup> - This high quality lamp is 25% brighter, for increased brightness without losing contrast. Quick Restart means that this great picture is only a moment away.

PixelPure<sup>™</sup> Hi-Bit Digital Video Processing - Using 12-bit picture processing (up to 14 bit internally), can create 4096 steps of gradation (steps between the whitest white, to the blackest black). and will also incorporate improvements in areas such as: real speed progressive scanning, video noise reduction, sharpness, and gamma control to set a new standard for picture quality.

**Four Step Dynamic Contrast** - Allows the user to customize the picture based on such factors as source material and ambient lighting conditions.

#### AUDIO

New Scoop Cabinetry Design with SoundStrip<sup>™</sup> Speaker System - Uses new a thin-line speaker system with enhanced dynamic range yields big speaker sound in a new cabinet that produces a 56" DLP that has greatly reduced height and width (67-1/16" W x 41 15/16" H).

**StableSound®** - Reduces unwanted volume fluctuations (eg. during commercials) by keeping volume within set levels, for easier listening.

SRS® WOW™ (3D, TruBass®, FOCUS®) - Greatly improves audio performance with improved fidelity and wider "sweet spot" for the listener.
