[&]quot;TV and some PC displays have standard overscan. Features, specifications and dimensions are subject to change without notice. Physical appearance of television and matching base may vary slightly from images shown on this document. Mitsubishi 3DTVs (738 and 838 series) currently support the side-by-side 3D signal format. For support of other 3D formats, such as top-bottom and frame packing (3D BL nay s standard), Mitsubishi 3DTVs will require the use of a 3D source device that outputs the 3D checkerboard format or a 3D source device outputs with the Mitsubishi 3D adapter. In all cases an emitter and matching 3D active shutter glasses or DLP. Link active regisses are required in order to view 3D content.
