

THREE DIMENSIONAL CINEMA COLOR

Mitsubishi revolutionizes large screen television with ground-breaking Laser Technology. LaserVue® Laser TV sets the new standard for large screen television by delivering pure, cinema-like color at a fraction of the operating power consumption of similarly-sized flat panel TVs. LaserVue® harnesses the power of the world's purest light source to deliver up to two times the color of many of today's flat panel TVs. Laser beams provide an extensive range of rich, complex colors, truly distinct clarity, and immersive depth of field.

It's the ultimate in picture quality, rivaling the amazing color viewed in the most advanced digital cinemas. Breakthrough laser technology creates an eco-friendly portal to a multi-dimensional, intensely real and vivid world. Beyond flat TV, experience True Dimension™. Mitsubishi LaserVue® TV. The Ultimate Large Screen 3D Experience!

LASERVUE® REFINED

- 3DTV* (VESA Jack and DLP® Link)

BACKPANEL

*TV and some PC displays have standard overscan. Features, specifications and dimensions are subject to change without notice. Physical appearance of television and matching base may vary slightly from images shown on this document.

Mitsubishi 3D TVs will support the mandatory HDMI 1.4a 3D signals and a few optional 3D signals intended for the United States. Specifically, the TVs will support 3D signals known as Frame Packing 1080p @ 24Hz and 720p @ 60Hz (primarily from Blu-ray players and gaming consoles), Side-by-side in 1080i @ 60Hz, 1080p @ 24Hz, 30Hz, 60Hz and 720p @ 60Hz, Top/Bottom in 1080p @ 24Hz and 720p @ 60Hz and Checkerboard in 1080p @ 60Hz. However, there may be some 3D sources that are not compatible with Mitsubishi TVs. In all cases: (1) 3D sources must connect to the TVs using HDMI inputs; and (2) Active Shutter 3D glasses with their own external matching synchronization emitter connected to the rear of the TV, DLP Link Active Shutter 3D glasses which do not require a synchronization emitter, or Active Shutter glasses compatible with the internal IR emitter in some TV models are required to view 3D content. External synchronization emitters must be compatible with VESA Stereo connector standards. Please refer to our web site www.mitsubishi-tv.com for the most current information.
