LCD TV 2005/2006

features

Designed along the lines of a piece of sculpture, Delta's new LCD TV with distinctive shape and style welcomes the user with the ambiance of a fine art.

Simplicity and thoroughgoing quality characterize Delta's new line of LCD TV, from a personal-sized 26" to a family-oriented 37". All feature a wide cinematic screen, metallic visual cue alongside with uniquely shaped speaker mesh, slim visual profile coupled with a half-circular base shape this excellent piece of flat screen audio/visual system.

In addition to design elements gracefully appointed in contemporary style, all Delta LCD TV features advanced digital video processing with Faroudja® DCDi™ which provides excellent reproduction for traditional signals from sources like DVD players and analog cable. Advanced CCS (Cross-Color Suppression) and TrueLife™ Video Enhancement technology further enhance the video quality and color dynamic range from analog and digital source alike.

A full complement of audio and video connectivity ideally situated on both sides of the rear housing allowing access with ease. An additional pair of audio/video input located at the lower left side provides easy hookup with game console and/or digital video recording devices for quick playback. Available audio enhancement technology also allows reproduction of surround sound with just a pair of stereo speakers.

Design Elements Make the Difference

Slim Profile

Wide Cinematic Screen with Stereo Audio

Side TV Controls and I/O Ports

features

Faroudja® DCDi™ and TrueLife™ Video Enhancement Technology

The newly developed Faroudja® DCDi™ provides excellent performance of de-interlacing and stable images without jaggy edges and flip-flops while viewing from conventional analog sources. High performance digital decoder converts analog signals to digital ones suppressing image distortions during the conversion process. The Cross-Color-Suppression Technology & TrueLife™ Video Enhancement Technology provides you with enhanced and dynamic color reproduction.

High Brightness, Contrast Ratio and Wide Viewing Angle

Wide viewing angle technology allows watching TV from a diverse direction. Advanced Color Calibration coupled with Dynamic Gamma Calibration technology provide fine tuning and excellent color reproduction and further enhances video with vibrant brightness and smooth color gradation.

Easy and Ample AV I/O connections

Easy and rich Audio and Video input and output connection design allows ergonomic hook-ups with a diverse video and audio devices from both sides of the rear housing. Abundant I/O ports allow a variety of video and audio connections.

Slim & Stylish

A slim and stylish design with small footprint further enhances the ergonomics and the practical use of the TV. Wall-mounted operation can also be carried out with the removal of the base.

Environment Friendly Engineering

LCD TV's low operation power consumption with EPA Energy Star compliant along with a low stand-by power makes this TV an environment friendly product.

Customizable Design

Designed to be versatile with OEM/ODM customer requirement for store-shelf product differentiation, front bezel visual cue, metallic mesh speaker grille and removable base can be customized for different needs.
